Fruit Ridge Notes  
from Ron Reister  
C.C.A.

## Fruit Ridge Notes - Saturday - June 8 - 2019

**Good Morning from Reisters Grower Services.... It's really Breezy this Morning...**

*WunderGround had predicted 12 - 14 m.p.h. Wind for early this Afternoon.*

*.....Still talkn Rain at Mid-Night and all day Sunday.*

**\*\*\*\* Those Tart Cherries ....** In 1 of our 10-Ac-Apple-Trial Blocks are really looking nice.... but only 50% of a Crop....

They have had a Every-Week-Steady-Diet "'005'" ....Right thru Bloom... All of it....Steady Weekly Diet.

Lots of Ya's remember apprx 7 Yrs back, when we proved that the "'005'" does not Russet Fruit Finish on Apples...Reds & Goldens .... We used "'005'" about 12 Apps that Season. But we had the Regalia and Formula-II-SW in the Tank also.... the Great "'1-2-3'" ..... So this Season .....

We are only using the "'005'" Alone... No other Scab-I-Cides that could possibly be given any Credit for controlling Apple-Scab.

So Far ...So Beautiful !!! 🍏 🍏 ....a few Days to go yet before Primary is over.....

**\*\*\*\* Q & A... Hmm.... Actually ...Vydate** kinda scares me. You'll notice its also Labeled for Thinning Apples...???

I understand your point. I see its labeled for Mites and Aphids & Rosies & STLM & WALH & StinkerBugs..... But some other really Nice & Easy & Cheaper - Safer products are also.

The only place I might be usin Vydate is on Young-Non-Bearing..... for Nematode assistance ...but I would apply as a Foliar. But then at \$120-Gal...???. ....2 Qts-Ac...??!! ...and other Products being so much Easier-Better-Cheaper-More Fun.... I guess I wouldnt be using Vydate at all.. There's just so many Biologicals now that really work well on Nematode... and lower Co\$. ....

.....and the those other Pests mentioned are all controlled for a Grand Total of \$12 - \$15-per-Acre.

\*\*\*\***You May Recall....** My mention of "**Shrimp-Brains**" at our **Winter Meetings...??**

The Folks at "Agrinos" have a very intricately involved Process with which they make the "B-Sure" and "iNVigorate" and the Agrinos-"5-o-o"... Our big Organic Growers are using a bunch of these. And now several Conventional Growers are as well.

If you are one of those Guys trying to bring back some severely Winter-Damaged Trees from the Dead.... Consider the 1 Qt-Ac-- [\$11]-"**B-Sure**" with your Tank-Mix of VitaZyme and Formula-II-SW. And always leave a "Check" so you can know for sure next time to have it in the Tank..... 👍😊

Some popular Products that dont do nearly as much Microbial-BioStimulant-Activity as B-Sure cost \$100 - Acre.... Just so Pitiful.

\*\*\*\* **Q & A... Yes -For-Sure Those Blocks** with a *History of F.Blight* are your 1st Concern....and all Blocks 'Down-Wind' from them.

As many of you know first-hand, it can get real ugly real fast.

If you are one of the many Happy "**005-Believers**"...??? You did a Full Cover [or 2 Alt-Centers] **1 Qt.Ac-"005"** the 1st Week of Green and Repeated in that 2nd Week of Green.... and then you also had 1 Pint or maybe 24 oz-Ac-in your Tank 1 - 2 - 3 times more after that...??? You are doing the "**Real-Deal-005-Program**" ..... I have really listened and watched You Guys....and None of You have had any F.Blight-Set-Backs. And also No Russeting issues.... It is **very** emphatically **UN-Recommended** to try this 'Program' with any other Copper Product. You will almost assuredly get Fruit-Finish-Russet.

There's at least one Product that has the same "A.I." as "**005**" but is clueless as to how **005** is Formulated....and they are claiming they are also "Systemic" ...??? They are totally **Not**. No Researchers agree with their claim. They are just Ccg our Label.

Best Regards .....r
