Fruit Ridge Notes  
from Ron Reister  
C.C.A.

## Fruit Ridge Notes - Friday - April 3 - 2020

**Greetings ..... Another Friday Rolls Up On Us.....**  
**...Guessn Very Few Folks will be saying "TGIF" ... just guessn..???**

Its hard to tell what day it is with this Mind-Numbing-Isolation-Weirdness ....  
... Gettn kinda crazy.

**So.... Very Much Considerable Green** showing up in several Apple Varieties this Morning ... Lots of Sun & 60\* all over the place yesterday .... and Lots more Today ....and Sunday maybe...??

**\*\*\*\* About the Lowe\$t-Co\$t-Acre Scab-I-Cide ....**That actually really works in Apples ....

...is the CapToZeb==2.5 Lbs-Captan80 & 3 Lb.EBDC...== **\$16.50...??**

So..... We are going to be doing a lot of....

**\*\*12 oz."005" plus \*\*24 oz.Captan80 plus \*\*24 oz.EBDC == \$15.80**

If we experience Weather conducive to FireBlight we will up the "005" to 24-32 oz. depending on Tree Size.

If we get real big Scab Pressure we will do the Full 2.5 Lb.Cap80 plus 3 Lb.EBDC '**CapToZeb**' Rates.

**\*\*\*\* We Will Also be Doing** a Low-12 oz-Ac-Rate DiKaP in our Tank-Mix for early Nutrition ..... and we will start our Calcium "MainStay-SI" at early Pink.... along with our Kudos 27.5WDG [ProhexadioneCalcium]  
We actually have Low-Medium-Doses Redox-Strategy-Products in every Tank...every Alt-Center ...Easy....Smart Money...

**\*\*\*\* Pals Asking about the Valsa-Canker in Peaches...**

Nobody has a great answer to Valsa.... also known as Cytospora Canker and 'Perennial Canker' Disease....

But...

Lookn at Pg 138--MSU-E-154...If you do your Tree Trimming a little later...like at Pink...??

... the wound will heal much faster, which helps prevent the Canker ....

And ... *Common-Smart-Money-Sense* dictates you will want to include in your Spray Tank...

**+++ 24-32 oz-Ac.-CS2005**

**+++ 24 oz-OxiDate 5.0**

**+++ 2-3 Qt-Ac.-FormulaII-SW-or-K-Phite7LP [SuperPhites]**

**+++ 24-32 oz-Ac.-SAver[contains SalicylicAcid and SuperPhite**

....Do this Tank-Mix 3 Apps - 10 Day Intervals - starting at Delayed-Dormant/Early Pink ... like now or early next week...??

**So... This Delivers to Your Peach Tree via Xtream Systemic Mechanisms...**

We're on the Web!

See us at:  
[www.reisters.net](http://www.reisters.net)

**\*\*SaliCylic Acid.... \*\*SuperPhites ... \*\*2 Potassiums ...**  
**\*\*"N" .... \*\*Phos**  
**\*\*2 Bactericides ... \*\*2 Fungicides ... \*\*2 Viricides ...**  
**\*\*2 SaniTizers**

So...Kinda just Common-Sense--?? ...Kill the Bacterial-Viral-Crap by Using Xteemly-Highly-Systemic-Tools...

I highly recommend only treating the worst 80%-90% of the Block...

...Why?? Because You will want to see the Side-X-Side Results.

And ....You're only spending Per-Acre on the Medium-Middle--Rates of the above Tank-Mix-Recipe== \$44-Ac.

And ...you can have your other Pesticides and Nutritional in that Tank. 🍌

And... *Keeping some Perspective...???* Just *Merivon alone* at the MSU-E-154-Full-Recommended-Rate-Acre is \$44... and they dont rate it anything for any Canker... or Mildew.... just only BrownRot...

If you encounter any Tank-Mix-Issues it will be due to some unfamiliar-low-grade-junk-chinese-crap in your Tank...

Remember... 99% of our RGSs Fave-Products are all USA Made ...and several made right here in Michigan. I have visited and seen and watched some of these Facilities. Very Impressive.

Yes.... \*Viricides ...also spelled \*Viralcides ...also spelled \*Viracides ...if ya want ..... 😊

On your 2nd & 3rd Applns in these Peaches...Make sure you also have an old S.I. or 2 in the Mix... I'd do both 4 oz-Ac-Tilt[Propiconazole] and 6 oz-Ac-Elite[Tebuconazole]...CheapCheapCheap 🍌🍌🍌

Check with the DeeTeam...These older SIs are Cheap. 616-887-9933 ...616-678-7708

Also---If you have wisely "**Stopped-the-Bleeding**" on your Peach Block...?? In your 2nd and 3rd Apps and onward, add in 8-10-12 oz-Ac-DiKaP.... our No.1 Selling Redox-Strategy Product ...

\*\*\*\* **Yup--Thnx for this, Alicia....** Another Huge Plus-Factor with Using "'**GreenFeed-27**" is that you get '99%-No-Ground-Water-Contamination' when using as a Foliar at these 2-3-4-Qt-Ac-Rates... Very Environmentally Friendly.... Very "**No-Leeching**"...

The "Slow-Release" Properties of this GreenFeed-27 works over 4-6 Weeks !!!

🍌 ...And fits Huge-Nice into your Redox-Strategy !!!

**Hey** ...Just talked to our mutual Dear Friend **Dan Raddatz** ..... He is doing really really Good....

and really appreciates all of Your Prayers and Well-Wishes

!!! 🙏🍌🍌🙏

Hang In There .... Linda & I are Praying for All of Ya's....

This Ugly-Weirdness will soon be Gone-Away .... Things will be Kinda Normal ....

*We will be Better For It .... Our Great God Wins .... Warmest ....*
