Fruit Ridge Notes - Thursday - September 26 - 2019

Hey Some Pretty Decent SunShine Today ... And Temps = Mid-60's.... 🙏🏻👉🏻😁 Kinda like what we ordered ...???

WunderGround talkn like a 100% Chance-Rain Friday

Evening... 😞👎 and a 45% chance in 4 out the next 8 Days following...

******Answer... a "Marine-BioStimulant"** ... is a nice fancy term for SeaWeed Products. Please dont confuse VitaZyme with SeaWeed. You VZ Lovers can tell.... VZ is crazy-weird.

If Ya want me to Guess...??? I believe it is a Xtreme-Hi-Tech "**Compost-Juice**" ...??? The Folks that make VZ are famous for their XtremeCrazy-Hi-Performance Compost Products....and they have a TopSecret Recipe for that... and some Variations of that Recipe... and different Compost Products.

VZ goes thru some "Fermentation" processes. It is just biologically alive crazy stuff. They may indeed use a 'SeaWeed' in their Recipe...??? I don't know that.

Seaweed... We recommend a "**Establish**" or "**KelPak**" Seaweed Product in the Tank-Mix several times per Year @ 1 Qt... Costs Less than \$10. But not in the same tank with VZ... Not that they wont like each other; its just that they overlap in their Job-Description.

Do VZ at *Pink--*Petal-Fall--*2nd Cover--*PreHarvest--*PostHarvest - 5 App-Season...

I like the KelPak/Establish in the Tank PreBloom or Bloom or both with a Scab-App...and 1st Cover and 3rd Cover... and also 3-4 weeks-Pre-Harvest with the Blush 2X and DiKaP... One Quart of either of those is only like \$7 - \$8 - Ac.

**** **AnyPlace** You Have Been Dealing with 2ndary Scab.... Be sure to include 1 Qt-Ac-CS2005 in your PostHarvest Tank.

Most all Apple-Blocks around here are getting great Coverage with 50 GWA. If you use 75 GWA, do 3 pints 005... If you do 100 GWA, do 4 Pints.

If you dont have any Scab or other Disease Issues, Do 1 Pint-Ac-with-50 GWA.

**** **Somethin on that Shelf...** In the SprayShed...that You Really want to get into that "Post-Harvest" Tank...???

If you got it here at RGSs, Chances are great that it will be very fine in that Tank.

If you aren't sure of the Quality of it...or the Compatibility...?? Save it for your 'Weed-Spray' Tank-Mix...

Use both your Indicate 5 and your InSpray-90 in that WeedSpray Tank...then You can Tank-Mix just about anything... even those over-Priced-Low-Tech-Liq-Nutrient Products you got talked into acupla years back... Lets get'm gone...

**** **Below** are some Photos of **HoneyCrisp** that I like...

Zero"BitterPit" ... Great Size & Color ... ++100%++Pack-Outs ...

Current Market being Real-Good-Money....

God Bless America !!!

This Grower-Fave hasn't done any ol'traditional-NPK+Micros-Granular-Fertilizers or Liming in many Years. He does Redox. He does most all the stuff you read about in FRNotes.

Warm Regards
