Fruit Ridge Notes - Monday - October 5 - 2020

Wow... A Perfectly Beautiful Monday Morning

Altho it is a couple Degrees cooler here than it is in Anchorage
Alaska... 😞

Very Encouraging....WunderGround projecting 10 of next 10 Days with
SunShine....

....Kinda small chance of Rain next week Tues.PM...

The High-Temps for 10 Days including

Today==59* 66* 65* 63* 70* 67* 66* 70* 70* 67*.... Avg=66°F

The Low-Temps starting with

Tues.AM==55* 41* 42* 57* 44* 45* 51* 52* 47*....Avg=48°F

****C.A.Lime...Yes...

.....**Nancy** is helping with Coordinating for those Guys that have an
extra few Pallets....and helping those who need a couple more Pallets get
together.... and...More Full-Truck-Loads available...

**** Thank You Berry-Berry Much !!!!! My Friend Mr. Dave

Trinka tells me there is a 2,4-D for Blues called **Embed Extra**.... Use
Rate 3 pints-Acre. 30-Da.PHI.... 48 Hrs.REI... Allowed 2 Apps-Season.
I'm sure Deanna will be "Dialing-In" on some of this....

Thank You Sooo Much Pal Dave... Appreciate You !!!

**** Wow...Great Discussion.... Good feedBack....

...Some Pals questioning whether or not they wanna go purchase any
'ElCheapo' generic Warriors ...and/or the generic
'AdmirePro'...i.e.Provado...???...to have both in their Post-Harvest-Tank
on any Tree-Fruit-Applns....??? 😞 ???

My Thoughts for my position....

***Soooo Cheap... ***Sooo Labeled for all kinds of seriously-expensive-
Insects that are in that Top-Soil over the Winter.....

***Soooo NoMess-NoFuss-Easy.... ***Soooo Cheap.... ***All the 'Blow-
By' hits the Dirt.... ***Tank-Mixes flawlessly.... ***You normally have
plenty of these on your Shelf in the Shed....

And....We just don't know what the EPA will do with a given Product at
any given moment... so I like using the Big-Guns that are almost Free...as
much as I legally can.

**** **Q&A... Yes...True...**Over the Years the Florida Strawberry Growers have made a common practice of Spraying the Crop about once-a-week...beginning at very early Harvest, with **Prevam...**

ORO-Agri Prevam... to make the Berries Dry-Off 2 - 3 Hours earlier in the morning, after a heavy Dew....so their Harvest Workers can get goin... 😞 I know most of them also have the OxiDate 5.0 in that Tank also. Real-Low-Cost-Cheap-Application-Smart....

On Apples--- 1 Qt. Each-per-100-Ga.... Zero[-o-] Da.PHI on Both... One Guy reminded me that he had drippn-Wet Tree Canopy til Noon very recently...

**** **Do You Have any Harvest Workers available...??**

Do you need some more Help...??? I can mention for you in these FRNotes if Ya want...

Hope You Have a Safe and Splendid Week of Harvesting !!!!

Locked & Loaded...
