Fruit Ridge Notes  
from Ron Reister  
C.C.A.

## Fruit Ridge Notes - Wednesday - September 2 - 2020

### Good Afternoon Faves....

🙏😊 A Very Appreciated 45/100ths Inch-Rain West of Sparta early this AM...👏😊

*The 10-Da-WunderGround* saying really Breezy this Afternoon...

..... and DownRight Windy tomorrow==23mph-Winds.😬

Pretty Big Sun 6 - 7 days of the 10... Chance of Rain Sunday AM...and Tuesday...and Wedn.AM...

The 10-Day-Average Hi-Temps around 75°F .....Avg-Low-Early-AM-Temps==55°F

.....Kinda almost like September...😬

\*\*\*\***Glad to Know some of Ya's are getting FineAmericas Jim Kruger** into Your Orchards with his ""**DA-Meter**"" to help determine the Ultimate-Best Timing for your Blush 2X applns.... Jim-Mob.Ph=517-719-0323

Some of You Guys just do Blush 2X as a 'Must-Do-Common-Practice' now... 2 Apps-Minimum.... because of the Results you have seen in the last 8-9-Years... You especially *do not* wanna skip Blush when you use ReTain... And now ....There are significant Numbers of Ya'll doin the DiKaP in that same Tank.... for a Color-Bump-Assist and a huge Nutrition-Factor for Sizing and over-all TreeHealth. All of the above very affordable for all Ya's that have 'Stopped-the-Bleeding'....👍👏😊

### \*\*\*\* We have Heard...

....And some of Us have seriously Noticed because the Renowned-Experts-Researchers pointed it out to us.... That an escalated very serious **Early-Season-Kudos 27.5WDG Program** [ProhexadioneCalcium] when we Tank-Mix our Fave Calciums with it... actually seriously reduces the incidence of Bitter-Pit... We really watch this in Honey Crisp.... because they are *seemingly* the most susceptible to B.Pit...??? It *seems* that way because our ""**\$Per\$\$Acre\$\$Return\$**"" can go from \$30K down to \$3K[Juice-Price] while if we get serious-ugly-B.Pit in Red Dels, the "**Per-Acre-Return**" goes from \$4500 down to \$3000[Juice] and doesn't hurt quite so bad.

We're on the Web!

See us at:

[www.reisters.net](http://www.reisters.net)

We ~~Reeeaaally~~ Appreciate you few Guys that actually leave a way to "Check" the performance against a more normal-relaxed Kudos Program....or No-Kudos-at-All...??? Huge Money-Making difference with Kudos from FineAmericas... Anything that reduces Vegetative Growth reduces your incidence of Bitter Pit.

Early-Early....When we are making Fast-Furious-Scab-Control-Applns anyway... Going **Weekly**...starting at Early Pink with 3-4 oz-Ac-Kudos 27.5WDG and a Top-Shelf-Hi-Quality Calcium Product, seriously reduces multiple threats...including Bitter Pit in Honeys. At Reisters Grower Services, we only Promote & Stock Hi-Quality-Top-Shelf Calcium Products.

Kudos 27.5WDG.... Allowed 99 oz-per-Season.... 45

Da.P.H.I..... Allowed 16 Applns.... 12 Hr.REI

We have plenty of Pals that do this Tank-Mixing with all the other stuff they are doing at Pink on thru 2nd-Cover...

Don't try this with just '*Any-Of*'-Calcium'..... There's a definite reason why the Label for Kudos and Apogee had told us for Years never to Tank-Mix Calciums with their PGR... 😞 😞

**\*\*\*\* Q & A...Yup...** SeniPhos...from Yara... the Folks that make Calcium Nitrate....

I think SeniPhos is a "Hi-Phos" Formula with a splash of "N"...???? Unless they made some serious improvements to that Formula...???...that I am not aware of...??? For my money its just a nice poke of Nutrition...Over-Priced.... We did intensive Trials for 3 Years with it about 25 Years back....No Consistent Results. Just do DiKaP....You get serious Results...

**Warmest Regards....**

**Locked & Loaded.....**
