Fruit Ridge Notes - Monday - April 8 - 2019

Hello Friends Mid 60s with some SunShine at Kent City
...andThere's some **Green-Tip** in most all Early Apple Varieties in
the **Hartford** AreaS.W. Corner ...

I Sent out a Fruit Ridge Notes EMail about 4 hours ago that I
inadvertently had "**Fwd: Thursday - April 4...**" in the Subject Line....???

Sorry bout that. I had a brain-fart.
I hope you all get a chance to look at that. Check out the Attachment

******1st-Green**----When we look at all the Various concerns in Apples for
the Time-Frame-Late-Dormant-Green-Tip.... And which Low-Cost-
Broad-Spectrum-Pesticides we can use And which Nutritionals we can
Tank-Mix efficiently Early-On I'm probably doing this.... Per Acre:

1 Qt CS2005
1 Lb Captan 80
1 Lb EBDC
8 oz Teb45DF
1 qt Phoenix[CalciumCarbonate]
10 oz PermUp3.2EC
2 lb Potassium

As I'm loading the Tank, if I am lookn at big Scab-Pressure....I'll likely do
2 lb.Captan 80 and 3 lb EBDC.[CapToZeb]
....and because it is also so Cheap-Easy, I'll likely do 1 pint-per-100-
Indicate 5 with 1 pint-per-100-InSpray-90.
And I'm using very little GWA..... 15 - 25 Gal is really great.

******There is Indeed a Significant List** of selected Systemic-
Nutritional and Hi-Tech-Bio-Stimulants and Macro & Micro-Nutrients
Products that I like, and a specific purpose and job-performance expected
of each. We seldom have a Tank headed out without a Nutrition in the
Mix.

My Wife **Linda**'s Sister Nancy passed away yesterdayafter a long
battle with throat Cancer.... Our Prayers goin up for my Bride and her
Siblings and Nancys Kids and GrandKids.
