## Fruit Ridge Notes - Saturday - May 30 - 2020

### Hey Favas....Cooled Down a Bit .... Mid-50s here this AM....

.... Looking ahead 10 Days...Counting Today .... Only T-Storms-Rain now showing on WunderGround are Wedn-3rd and Sunday-7th.... the other Days all showing mostly SunShine.... Gonna have acupla Cool Mornings...But then Tuesday Onward...a Weeks worth of Days in the 80s...

\*\*\*\* **That Ridge Area Apple Scab Infection Wedn-AM thru Yesterday**-AM...49 Hours--Very Significant ....Symptomatic Ugliness should appear June 5 in any area where we 'Missed-a-Spot'...

\*\*\*\* **Blues Pals.... Anthracnose ....** We've had some Weather recently that is extremely conducive to Disease-Progression... Anthracnose loved it. We know **OxiDate 5.0** Kills All Disease Pathogens 'On Contact'...Dead.... And....

We know this stuff is just crazy Low-Cost-Hi-Efficacy .... I highly recommend it... Doin several Applns.

Dump in 2 Qts-per-100-Ga.... Where your doin 25 GWA, this is costing only **\$4.50-Ac!!!**

This goes in Tank-Mix Very-Nice with All your other Smart Money Fave-Choices like

**6 oz-Marazo[Tilt]\$3.60 \*\*\*** and **12 oz.Mazolin[Abound]\$12 \*\*\*** and **3 Pt.K-Phite-7LP/Formula-II-SW-\$10 \*\*\***

Please *Ponder* This a Sec.... This Tank-Mix Delivers for You... 3

Bactericides ++ 4 Fungicides ++ 3 Nutritions ++ 1 BioStimulant.... So, Lookn at all the Job-Descriptions, you are getting **11 Hits Total !!!!!** ... for like **\$30 - \$31-per-Acre-Total...!!!!**

So.... What do we get with **\$65-worth-Pristine...???** 😞 What are we getting with **\$78** worth LunaTranquility...???? 😊

### \*\*\*\* **Scarey...?? Too Warm with Too many Open Flowers...😞...????**

....And then the **Precip...** 😊 Sooo.... Be very watchful for Symptoms of F.Blight...

That "'Blight-O-Meter'" thing was-still is pretty ugly....and somebody always gets caught in scenarios like this....Always.

RagTag Bloom is plentiful...and very dangerous....especially on those really Young-Hi-\$\$\$-Investment-Non-Bearing-Blocks. Of course you already know the **"005"** is the best choice on all the above for **Consistent On-Going-Protection....** Cheap---Systemic---No mess.... Tank-Mixes with All Your Faves.

**\*\*\*\* Formula-II-SW vs K-Phite-7LP....** These are Both Incredible Systemic Nutritional-Fungicidal-Bactericides.... The F-II-SW is Registered as a Nutrition...Not EPA Registered as a Bactericide-Fungicide.... and K-Phite-7-LP is the only one of over 100 "Phite" Products on the Market that is EPA-Labeled-"Bactericide" and Fugicide..... These are apprx 28% "P" and 25%"K"...The F-II-SW has the SeaWeed & Zinc components... Low-Cost-Hi-Efficacy....

**\*\*\*\* Q & A ...Good One...** Yes....Not at Your Place... But ...There are several Beautiful 20-Yr-Old-Blocks [or Older] that I know of that are very well Trained & Pruned and in enviable Production-Mode... just Fantastic Production. And producing great Quality... Many times on 6 Ft-in-Row by 12 ft Centers. These Guys are 12 Ft Tall...and Full-Throttle. Those TRV-Scenarios get the Full-Throttle Per-Acre-Rates of all the Fave Products goin into the Tank-Mix. When you have Much-Less-Bearing-Surface-Trees....??? Less TRV... ?? You do proportionately less-Product-Acre.

**\*\*\*\* Watch Your Timing with EBDCs ...**with that "77-Days-PHI" thing...??? There are 1 or 2 Proc-Apple-Buyers that dont want any Apples treated wEBDCs after Petal-Fall...

Praying Blessings on Your WeekEnd.....
