Fruit Ridge Notes - Wednesday - November 6th - 2019

Hey Friends ...

This Snow on top of all this Mud makes it seem futile to discuss anything that requires an Application with Ground Equipment...

..... This is pathetic.

Some very sharp Patriarchs in their 80s tell me they dont remember a Fall this screwed up Wet

When I was young I recall some Ol Boys and my Dad sayin..."A Dry Year will scare the dickens out of you...but a wet Year will kill ya."

**** **This Xtreme-Wet** is also really amplifying the "Winter-Damage-Wet-Foot-Phytophthora-Canker" Issues

For Apple Guys and Blues Growers... just crazy awful.

At least most of the Blues are generally on Sand.... But there's still water standing way to long ...

**** **I Do Not Know....** Nobody has ever brought this up to me before. "Do Mice & Voles become less of a threat in Swamp-Conditions...??"

Don't Know... Listening for Feed-Back... I can't believe they would like this crap...???

**** **Pro-Tect AG-Mix ...**Yup... I have a few Guys that use this 1-2-3 times-a-Year ...

I like it ...It comes from Pal Patrick--the MSU-Kid...now Manufacturing in Fresno... Its 6% Sulfur... 7% Manganese... 4% Zinc... along with the C.A.F.-Fresno-Inert-Goodies... Very popular in Blues... and Actually anywhere... Any Crop where you have a *Zn or *Mn or *S Deficiency....

Most commonly used Rate-Acre=2 Qts Foliar. For Soil-Deficiencies-Do 2 - 6 Qts-Ac.

This is huge popular in Ornamentals & Turf Crops all across the Country as well.

Comes in 2x2.5g.Cases.

**** **Hey Ya'llAskin for Prayers**

My Angel-Baby-Bride-of-50 Years is having Aortic-Valve-Replacement Surgery tomorrow morning We are asking Almighty Jehovah God to be guiding the hands of the Surgeons.
