Fruit Ridge Notes - Friday - May 3 - 2019

Greetings from Fruit Ridge Ave....

It Looks like the Sun is actually trying to prove it's still with us...?? Key word.... 'Trying'

"WunderGround" 10-Day for Kent City calls for High Temps = 66*--68*--63*--59*--53*--51*--57*--60*--62*----with the Lowest Low at 41°Fand with Rains Next Monday--Tuesday--Wednesday--Thursday.... and that Wedn--Thrs look to be quite Windy...???

But that "*Wind Thing*" is very difficult to predict..... Only Half the time do they call it quite close.

******Talked to a Pal** that just acquired an older Producing 20-Ac-Block-Apples..... Gala...Macs....Reds... It was managed well last year, but hasn't been Sprayed yet this season and his Neighborhood has had 1 or 2 Scab-Infections...

He does 10 Ac-Tanks.... He does Alt-Centers ... Gets 1 Full Cover-Both-Centers-every Week.

I told him 'No Sweat'

He will do 2 Weeks of 1 Qt. CS2**005** with 5 Lbs. Captan80WDG ... and thereafter...

.... 1 Pint - CS2**005** with 5 Lbs.Captan80WDG.... told him to add 3 lbs EBDC anytime.... whenever he wants.

There's apprx 40 Days left yet in Primary-Scab-Season??? We'll keep Ya'll posted

******There's Plenty of Leaf Surface** to grab and absorb your DiKaP now.... This HighCarbon "'Redox"' Nutrition gets sucked into the Plant-Tissue immediately.... Really fast. We run this at 1 lb - 2 lbs - Acre several times. It goes in well with everything. We're seeing a bunch of TightCluster and plenty of 3/4 inch leaves....and some PrePink-Opening Clusters. All of your Redox Products are immediately available to the Foliage and/or Soils. Some Guys do 1 lb.DiKaP whenever they do a CS2005 App. Very Sharp Move....

This several days of ColdClammyCrap induces some serious Stress some Foliage would really appreciate the help.

**** **"Vintre"** ..from **ORO-Agri** Excellent Penetrating Surfactant ... Yup---Many Growers use this at a "0.3%vv" Rate with **All Sprays**....

All Insecticides....Fungicides.... Herbicides... All. That Rate translates to about 15 oz - 40 ga.Water. Some Guys just figure 1 Qt-per-100-Gal....

The **Row-Crop** Guys that rave about it, are claiming when applied with their Glyphosate it kills "Resistant" Weeds-Grasses.... ??? Hard to believe ... but they're doing it. I know a couple of them that are using more than that 1 pint - 40 gal.... One guy is using 12 GWA and using 1 Pint-Acre-Vintre.... and it Saves them a ton of \$\$\$\$\$\$.... Save\$ them a 2nd Pass.

ORO-Agri also has some of this same Technology that is available for **Organic**-Production Guys....**OMRI** Listed.... Like... **ORO.Boost** "'WSDA"'Listed... Replaces all MSOs and COCs & pricey Silicones.....Makes Systemic Pesticides more Systemic faster !!

**** **Organic Production** **OMRI** Listed Products It's a very good time for my Organic-Producing-Pals.... Seriously **Wow**....

Lots of very Cool Toolsincluding 5 or 6 Products from Redox...??? This is so Huge !!!

And remember that "'5-0-0"' from Agrinos.... Excellent "N" source...

**** **Q & A** **Yup** **"Imidacloprid"** ...You wanna stay away from Bloom...by 10 Days or so. And remember... In this Time-FrameWe are already doing some serious Butt-Kickn-Nukes in the Tank... So...My Imidacloprid [gn Provado] into the Mix later when there is less 'Duplication' of Job-Descriptions really makes sense.

Remember that your generic Provado is extremely-Low-Cost.... like **\$2.60** ??-per-Acre...?? There's lots of names for it ... Make sure its a **4 LB-Ga-A.I.** ...Make sure its a **3.2 oz-Ac-Full-Rate**.... Make sure to do this 3.2 oz-Ac. **5** times to Max-Out your **16 oz-Ac-Legal-Seasonal-Limit**. Total per-Season-Cost = **\$13** - Acre....

Controlling all kinds of Aphids.... LeafHoppers.... S.T.Leaf Miner.... and Some claim it puts a hurtin on Apple Maggot and S.J.Scale. XtremeLowCostEfficacy.... Be sure to get the right

"Imidacloprid" OK, Why risk it.... Just Order it here... ☺

**** **Yup --- Open Saturday A.M. 8 - Noon**

Have a Great Weekendr
