## Fruit Ridge Notes - Monday - October 28 - 2019

**Hey Friends ....** Well... I saw SunShine for a few minutes about 8.30am.... It was all-over-done-with by 8.39a.... Today is to be the warmest out of next 10 days...about 50\* right now... ☹️

Unfortunately.... several Precip chances again this week....and some Snow maybe mixed in Wednesday and Saturday.... ☹️

All the Folks I talked to Sunday said they got 2 Inches Rain Saturday.... This is really gettn historically awful. This isnt gonna dry out with this Forecast.

There are only a few Guys left that have some Fuji to bring in yet...???

Some Corn Guys saying it might be March ....

**\*\*\*\* Bacterial Diseases... Do You remember that K-Phite-7-LP ...** is the only one of all the Phites that is EPA-Labeled for Bacterial Diseases...???

...And that it is one of only two that is all-Pure-Virgin-Grade-"P" in its composition.... What we Call "Super-Phites" ...???

For Any-All-Bacterial-Diseases like in Tarts--Sweets--Peaches--Apples---- All the \*Curls & \*Blights & \*Spots & \*Cankers ...all of the Above... Doing 2 - 4 Qts-Ac-Post-Harvest-Foliar is always a very Cost-Effective-great-Disease-Control-Idea...

There are only 2 "Super-Phites" ...the \*\*K-Phite-7-LP and the \*\*Formula-II-SW ... Un-Surpassed in Efficiency and Per-Acre-Value .

**\*\*\*\* So.... Getting out there to do the "Post-Harvest-Apps"** that you still plan on doing where you had "Issues" ...???

Really Muddy ....But .... We're Lookn at doing .... if possible....

Where You Have any Hi-Dollar-Blocks that gave you a FireBlight Scare...???

Do 1 Qt-Ac-CS2005 with 1 lb-Ac-DiKaP....

Where You have any Big-Investment-Blocks that had too much Scab this Season...???

Do 1 Qt-Ac-CS2005 with 1 lb-Ac-DiKaP ...actually, wherever you had any Scab, you should do 1 Qt.CS2005.

Getting all this applied as soon after Harvest as you can works best. This will help with fighting a significant list of Disease Issues...

...and Yes...Tank-Mixing the Super-Phites with DiKaP works fine....and the "005"....our SuperPhites Tan-Mix with virtually any-all of our Fave Stuff....

...But please do not try this with a Junk-Phite....ie.

CottageCheese... Need smaller guy with a bucket and a shovel... 😞

\*\*\*\* **Peach Leaf Curl...** When you see about 50%-Leaf-Drop ....  
Another Option... Do 1 Qt-Ac-CS2005 Tank-Mixed with 5 Lb-Ac-Ziram ....Put your 1 Qt-100-Ga-"InSpray-90" into the Tank first ...

\*\*\*\* **This Saturday ---November 2nd ...**

**1.The LCDSF Dinner & Auction Party...call me for Tickets--616-887-9933 office...616-437-0073 mobile**
