Fruit Ridge Notes - Thursday - June 25 - 2020

**25th.... Only Six-Months til Christmas....
Still No Rain...**

WunderGround 10-Day says 9 of 10 with Sun...All Hi-80s to Low-Mid-90's...

Great if you're a Kid... 😞
Reeeeaally Need a Rain..... Gettn Bad...

******SunBurn--SunScald ...**Will Soon be a Huuuge Issue.... Much sooner than we think. That **Parka** is by far the Product of Choice in the "High-Desert-Areas" like Wenatchee.... Yakima... My Pals there refer to their Neighborhood as the "High-Desert"... Those Guys get an avg of 9 inches-Rain-Year... While right here west of Sparta we already have 20 inches this Year.

But the Sun out there attacks worse in that Dry-Air... They are Protecting for Burn-Scald from 2nd-3rd-Cover onward. Most of our Pals use the **Parka** as the BackBone of their "Burn-Scald-Prevent"..... Using 1 Ga.Parka into 100 Ga.Water...and... They add certain Pesticides to this Tank....But they dont get crazy... And **never add anything** like a 'Surfactant-Adjuvant'...

Many of You have seriously looked at the "other" competitive products...They have Zero help against Cracking, Russet & Flecking....No help for Coloring....No Help for Cuticle-Damage-Repair... But they do leave a serious Residue. **No Residue ever with Parka.**

...Also.... Some PNW Associates tell me they have serious Issues with the Morpholine containing "Carnauba" products for European Exports....

****** Hi-Risk-Hi-Dollar-Hi-Density-Hi-Vigor.... Huuuge Investment...**

So...Until the intense-new-lush-growth eases-up a bit....?? There's a serious risk of FBlight getting in there in all this 90°F-Crap... We're told to expect almost 90* or over 90* from tomorrow onward for over a week....

...Lots...Many Huge-Rains early-on...Lots of great-active Irrigation...Lots of superb Growth... Lots of Vulnerability...

... and Oooo Baby ...It's gonna get Hot....

You know the Drill...

**** **Just Thinkn... of How Prudently and Effectively Amy & Phil** and their Team have handled all this CVD19-Crapola... This has been a huge "Pile-a-Crap" for All of us.... But our MSU-Team has certainly managed it well.

Thank You Thank You Thank You... 🤔👏😎👍👌 ...and may God Bless the U.S.A...

**** **I checked with Jeff earlier Today ...**Why no **agr.news** this Morning...???

He said''...finally ran out of gas and ink...Gettn too old for this job'' ...

I seriously hope not.... His reminders are Sooo important to Sooo many Guys & Gals....

So...in Wayne County.... UpState N.Y... Jeff says "Lookn-Doubtful" for the Big-Early-August-Fruit-Grower-Tour-Clam-Bake-BBQ where Linda & I so often see many of you

And...While we are on that topic...Our traditional-late-July RGSs "'Fruit-Ridge-Fest"' is not lookn to promising... 😊 Many Associates-Vendors-Manufacturer Pals cannot do it... Lots of Pals-Advisors-Friends telln us to skip it... 😞 We'll see.... We will do somethin... The DeeTeam is workn on it...

**** **A Bit-o-Confusion...** I've been referring to **OxiDate 5.0** as abbreviated "'5.0"'

... and Ya'll know we call the **MagnaBon CS2005** simply "'005"' ...???

These two do Tank-Mix and work "synergistically" ...

"**In-Sync**" ... some Bible References explain it as "'Walking Together"'

Also....an Ol Pal says...."'Do you remember when...???' ...When we used to take a very Hi-Potency-H2O2-HydrogenPeroxide Product and Tank-Mix it with all kinds of other goodies...???' Yeah....about 40 Years ago. We had to get away from that. I had too many 'Issues' with improper-not-careful-procedures.... and some Phyto for some Guys ...

Soooo Thankful for "'5.0"' ... BioSafe has taken all the GuessWork out of it...and Reeaaally Lowered the Cost The 5.0 is **Not** just simply H2O2....Look at the Label... Lots of Safeners...

Sometime...Over a BeerI'll tell Ya's about some of the exciting 'Episodes' of the H2O2 Days....

Amazing.... Amazing we're still alive... 😊😎👏😎👍

...**And May our Awesome God Save our State....**

Locked & Loaded....
