Fruit Ridge Notes - Friday - February 7 - 2020

Happy Friday Kiddos.....

Wow.... These Fridays really roll up on me fast !!!!

**** **Yup---Today--2.30pm--Dads Barn--1718 Gooding St--Conklin--**
-

---Meeting with Ken from "Harvest-Solar" ... for some serious **Q & A** about the 'Ins & Outs' of installing Solar-Panels to help with Electric Costs... at the Residential Level ...and also on the Huge Scale ...like a bunch of CA-Cold-Storage-Guys have done all around the Ridge and elsewhere...

**** **Planning Strategy** Caring for **Stunted or 'Runted-Out' NonBearing** or Young-Bearing Apple-Trees...

A Couple Things Experts suggest...

+++**Dormant-Prune** very hard for 1-2 Years...Prune off 25% - 30% of the Tree-Top with heading"stubbing" cuts, removing all of the spurry wood & fruit buds.... this so as to surgically make the Tree-Top much smaller than the dwarfed Root System. Jeff Alicandro says those really weak Trees "'need to look just plain butchered'" when you finish pruning them ...or it might be many years more of the same Runted-State...

+++**Thin Off** most of the Crop Load with very huge Full-Rates of Carbaryl[Sevin] and Exilis[6BA] at Petal Fall and Repeat Appln in 5-6-7 Days. Avoid using the NAA's and Ethrels on these suffering Runted-Out Youngsters.... as those chemistries really hurt Tree Growth.

**** **Great Comments** and Feed Back from several Pals at the Wednes-Fricanos-Event about these *Fruit Ridge Notes*...

Thank You so Huge !!!!

I really appreciate your support and encouragement !!! 😊😎😊

But... If you are receiving these and do not need them...???

...or ..Your Wife or Kids keep tellin you that you are getting these and you never read them...???

You can stop these by just doing a "'Reply-All'" on this one saying "'Off'" ...and the DeeTeam will get you off the EMail-Lists... I just dont wanna be a nuisance.

NBC... Almost 3 Times more Folks watchn Fox than the other 3 put-
