Fruit Ridge Notes - Tuesday- March 26 - 2019

Hello from Fruit Ridge Avenue.....

This week's Forecast....

*****I read about another new Copper product claiming to work "systemically" ...with no collaborative data from any University or Independent Researchers.... that bullcrap gets aggravating.**

...real Early Green Apps of "005" Systemic Copper is seriously prudent in all producing Apples and Nurseries and young non producing blocks....as well as all Pears and Stone Fruits and Blueberries and Grapes

******Has Anyone heard any more about us using Lorsban??**

If we are doing Lorsban, be sure to watch the Forecasts and don't let a nasty heat-wave move you passed your best time frame Appln window.... You want your full 2 Qt.Acre on by or before full Pink. Remember, this is a low.cost buttkickn Nuke. Use the 2 qts even where you normally dial down with tree row volume. Also use in non-bearing

....fighting Scab in Apple ... Alicandro reminds us to be sure Nozzles are getting plenty of coverage to the Tree Tops. Our protectant products like CapToZeb cannot redistribute upwards with the rains.

...yup...we do include a lot of Captan80WDG in our long range disease control strategies...and we love it. But we never ever use any Oils of any kind. None. Ever. 99% of you have messy stories of how Oils have made your life miserable.

Warm Regards
