Fruit Ridge Notes - National Day of Prayer - Thursday - May 6 -2021

Good Morning Agri-Pals & Associates *Very Cold-Cloudy-Drizzln-Ugly here this Morning...* Perfectly awful Pollinating Weather. Saturday & Sunday AMs are supposed to be really Cold...33*..??....34*..??
The *WunderGround-10-Day* is thinkn pretty Cold like 4 Mornings in a row.... Cloudy-Rainy Today-Friday... Sunshine Saturday and then Sunny again Monday thru Friday... with another chance of Rain Saturday-the-15thStayn Cold til next week Thurs-Friday-Saturday ...maybe some mid-60*s then...??...
Kinda Windy tomorrow...then again Wind on Monday....

This Cold Weather keeps Insect Activity at a Low-Ebb... But they're still there... And they'll be coming on with excessive-pent-up energies...they'll be in a "Catch-Up-Mode".... Most Guys gave them a good-dose of very Low-Cost--Very-Hi-Efficacy Buttt-Kickn-PyROIDS 8-10-12 Days back... Very Good Move... Their 'Battle' will be only 25%--35% of the War in store for the Guys that skipped it... Later on...the most effective Chem-Remedies for several of the Insect-Pests co\$t alot more... Waaaay Lots More....

Scab is very ready with 77KaZillion Spores at the gates...waiting for a Wetting-Excuse ... the fresh-new-UnProtected--Foliage keeps on slowly-gradually coming forth.

Keepn Teb45DF in the Mix for Mildew...even when its Cold..??... Yes... If you read that Label..??...You see it's Labeled to do some serious good on other Disease issues as well.... and Teb is SooooooLowCostCheap...

Q&A Yes...Almost Always... Our Fave N.I.S.90-10 *InSpray-90* is in our Tank almost always....

"NIS" means simply 'NonIonicSurfactant'.... the '90' means alot more pure-very-High-Quality A.I.s compared to a "80-20". Most common-much-cheaper-"NIS"-products are '80-20s' they have considerably more very cheap ingredients. We know InSpray-90 dramatically enhances the effectiveness of our Kudos... All PGRs ...Exilis 9.5SC[BAThinner] ...All Insecticides... Fungicides... Nutrients and BioStimulants... '90-10s' are seriously recommended by serious Researchers, University and Independent...

Also....Whenever we find a Pesticide Label that is strenuously calling for a 'CropOil' or 'SummerOil'...we simply use a higher rate of InSpray-90....like 3-4 pints-per-100-Ga-Water.

And Yes... there are other 90-10s... Great productsbut we know Brandt makes the best one--"InSpray-90"--and delivers it to us for much less \$Co\$t-per-Gallon than the other ""National-Name-Brands"" ...It's a 1Win2Win3Win4Win..... 1You & Your Crop & 3RGSS & 4Brandt All Win..... Saving about 50% compared to some.... Then....Also...

...There's some Pesticides that very emphatically want the *Water pH adjusted.... and the *Minerals [Hardness] in the Water

'Sequestered'... So we do the 1 Pint-per-100-Ga.Water "**Indicate**

5"....another High-Tech-Top-Shelf-Quality Product made by Brandt...It is also a Medium-Light-Weight Adjuvant... But for BigTime Spreader-Sticker-Penetrator we need the InSpray-90. Some Pesticides Do Not want the pH to be Lowered.... and some won't work worth a crap without lowering your pH. Most Water sources around West-Central Michigan are pumping Water with a pH of 7.8.... But many Pesticides are Reeeaaally Happy in a pH of 5.5-5.9and the Indicate 5 at 1 Pint-100ga. does this.

Some very important Applns we make Do Not want a Low pH....Like the incredible **Bird-B-Gone** product that so many Guys have really great success with...the ""**AvianControl**"" I remember a Customer doing SunFlowers in Wisconsin simply could not keep the Birds away ...just awful... We figured out he was lowering his Tank-Mix-pH like per-usual-'Normal' to 5.7-pH...??? AvianControl like 7.6-8.2 pH.... So...Then it worked Great !!!! No more Birds...

Jeff Alicandro Reminds his Readers..... "**Never UnderEstimate just how much Scab loves cool-slow-drying conditions**"

Those Wayne County N.Y. Apples Guys can now see evidence of their first Scab Infection back on April 16th ...it was a Doozy...a 3-Day-Deal...at Early-Tight-Cluster...

Today is our ""**National Day of Prayer**"" Organized and SafeGuarded by the Presidential Prayer Team....

We Pray for our Nations Leaders.... We Pray that their Hearts--Souls--Minds and Objectives be totally consumed by the Power of the Holy Spirit of Jehovah God.... Our Triune God... Our Holy One of Israel God... Our Fortress of Jacob God...

..... to our Awesome God be All the Glory !!!!!

Gods Peace....

Locked & Loaded....r
