Fruit Ridge Notes - Wednesday - September 4 - 2019

Greetings Friends

Right Now ...**WunderGround** is saying there's a 48% chance of Showers Friday early AM...

...and Windy Saturday & Monday & Tuesday...

And... In Yesterdays FRNotes.... "'Algoma"'...?????

I guess Ya'll know I meant Alpine.... 😞 It's commonly referred to as "'Brain-Flatulence"' ...and when you reach my age it can get pretty stinky 😊 😊

******Jim Kruger--FineAmericas....** Has been runnin all over the Upper MidWest & Canada with his "'DA-Meter"'and the Timing looks really Good right now for Blush2X on Gala....and within a few Days also on Honeys. Use 1 Qt-Ac...Repeat in 7 - 10 Days. It'll likely be 7-8-9-Days yet before that DA-Meter says to go on Braeburn--Fuji--EverCrisp... There are some Guys that didnt think they could see results with Blush when they tried it "Once" several Years back... that are now back on track after they used it last year and had very impressive results.
Please.... Always leave a Check-Row....

**** **Hey John-CalTec-AG...** Are you reading your FRNotes...???
We had good results using your **Ag-DEcide** Product on the Pear Psylla at Alpine Township-Trial-Block...
Call me Please

**** **More Q&A** Ref'g the **Disease Control** in the 10-Ac-Apple-Trials....

++Yes👍 We were using various Rates of the "**005**" depending on Pressure....as Low as 12 oz.... And as High as 1 Qt.

++No-😞--Fung-Out has not really been 'Proven' around here yet ...?? It looked very strong in 2018 Trials.

I think it is going to be a very strong Tool. Organic Guys are gonna love it especially. The more some of You Guys use it the more we'll keep watching.

++No--No Tebuconazole Manufacturer will be telling anyone nowadays that Teb will control Scab. But it is so doggone cheap, it's hard or me not to put it in the Tank....for Mildew.

++Yes👍 We did include Redox DiKaP in several Covers with the "005"...Those 2 love each other... and the Redox"DiKaP" has some S.A. in it... and there's a lot of Growers now saying they are finding Fungicidal-Strengths with DiKaP...??? Like the Blues Grower using a lot of DiKaP used 3 Fungicide Applns instead of the typical 8 Applns... No EPA-Disease-Control-Label on DiKaP.

++Yes...I am guessing there is a way to use Diazinon 50WP without russetting Fruit. But it doesn't include tank-mixing with 7-8-9 other Products. Diazn50w is still a Cool-Tool...we'll keep playing with it til EPA takes it. 😞

++Yes--Thanks--We did indeed prove that "005" controlled Scab and all other Diseases in Apples ...about 5 Years ago in these same Trials...But Remewmbewr, it was part if the "1-2-3"... in the Tank with Formula-II-SW and Regalia. Very Impressive. 👍😎

++No...Not Happy with Insect-Control-Gooding St... Reasons being the same issues I have told Ya'll about a few times earlier...?? The Bulk Boxes and abandoned Orchards on our West Side. But...at Alpine BlockAll is well. And we used only the very *ElCheapo* Insecticides. Details soon...

++I am still hugely impressed with the "**Kudos**" part of this years Trial. Remember how Kudos & Apogee don't want us Tank-Mixing with our fave Calciums...??So thereby costing us some extra trips thru the Orchard...?? So...Our Kudos worked GreatIt worked Really Great !!! Even while we Tank-Mixed it with 4 of our Fave Calciums... 4 - 3 oz.Applns !! Excellent Results. 🍌👍
More Details to Come.....

Gods Peace ...
