Fruit Ridge Notes from Ron Reister C.C.A.

Fruit Ridge Notes - Thursday - May 21 - 2020

Greetings Friends .... Perfect Sunny Thursday Morning .... Gonna get Warm....

WunderGround has now taken another Day of ThunderStorms Out of their Forecast... Down to 5 of 7 now.... And Going down More...???

**** **Questions Concerning Fire-Blight...Open Bloom...**

....A Serious Concern with the Temps Forecasted.... and the Precip in the Forecast...

I recall all of the Guys using CS2**005** Whenever Wherever they want...As Much as they Want .... No Russet-Fruit-Finish-Issues... But...If you're gonna do this, be sure to leave a Check-Row or several Check-Trees so you can see the difference.... And make your Notes for Future Reference.

If you are just to skeptical or scared to do a Copper of any kind in Bloom, then I'd do 1 Lb-Each--StrepMycin & MycoShield ahead of the Predicted Event.

I would never ever do any old or new Copper in Bloom other than the '"005"' ...Because Soooo Many of you have proven the Xtreeem damage those old [or new] BluePaintSludgeJunkCoppers can do.... and ....proven that your'"**005**"' actually brings Fruit-Finish thru to the Finish-Line with less-Russet than than the UnTreated Adjacent Blocks...

😒Yeah.... So..... 😕 ....There's 10 Years of Proven-Performance ....Now with Hundreds of Growers.... Showing the **Systemic '"005"'** controlling Scab & F.Blight successfully... with maybe 2 - 3 Guys thinking they... '"might have seen some russeting...but not sure if it could maybe have been a different unfamiliar product in their Tank-Mix...???'" .....And here I am ...still saying ..."Walk-Before-You-Run"....???? 😖

**** 🤔 **I can't think of any F.Blight-Control-Products** that have Reach-Back-Eradication-Properties that will handle waiting til the Tuesday after the Holiday...???🙄🤔😎

**** **And... Thinkin Bout this Long WeekEnd....**

*If You run up against an **Emergency-Product-Need-Dilemma**...???*

Call me....***616.437.0073***... I can get in touch with Alicia, to make sure if your Product of interest is 'In-Stock'... and We can hopefully get you covered.... And.... If its too tricky for me, Alicia is gonna be in "the Hood" and can meet You up there....

****** Some Sweets West of Traverse City now in Bloom....** It still amazes me that they come right on thru that 12-15 Weeks of Ground-Hogs Day Weather with such beautiful Bloom... ???!!!!!???

****** Yeah---I Know---- I Hear that from Time-to-Time....**
🤔that some of you leave out the Captan during Bloom-Time-Tank-Mixes...??? ....and some Ya'll claim its only one of the Captan Products that is the Culprit...???
Most Guys I know use the CapToZeb right on thru....??? So...Your Call.... That one is All-Over-the-Board... I'd reeeaally Appreciate your current FeedBack on that Issue.....

****** Its a Wonderful & Optimistic Outlook....**
Quite a Few Guys already asking us about **Exilis 9.5SC**.. This is by far your be$t-mo$t-efficient choice of BA.Thinner"Benzyladenine"..... *Exilis 9.5SC* ... 1 Qt does a smidge more work than a Gallon of the old competitive product... for 100 ppm in 50 GWA...Do 6.4 oz... Comes in Quarts... 4 per Case.

****** Yes --- We Do Indeed Include Our F.Blight-Control-Products ....**
and our Scab-Controls.... and Nutritions... and our SAver ... right in with our ***Perlan*** Appln....
All of our Fave-Products work together Synergisticly.... and Play Very Nice Together...

****** There are Some Serious Experts** that Seriously Know what They're Lookn at .... that are Saying we are seriously Lookn at Waaay More than a "50%-Apple-Crop" .....???? Amazing .... Crazy.... Thank You Awesome Triune God ....

Startin to Cloud Up...??? 🙄😎😒☹
