Fruit Ridge Notes - Tuesday - July 2nd - 2019

Greetings Faves So...

It Rained a bit Again this AM.... Some Guys got way too much.

Today Our Deliveries are in SouthWest Michigan Matt left Early...Lots of Stops. and **Tomorrow up thru Oceana County and Grand Traverse County Areas...**

If you're in the North and need somethin tomorrow...

Pls call us right now....616-887-9933....616-678-7708Loading Truck today ... Leaving really Early a.m. tomorrow.

****** Hot Hot Hot Remember Not to Go Spray in the "Heat-of-the-Day" !!** Not Good for anything....

****** VitaZyme Apps....** Help to increase Carbohydrate Assimilation in the Plant...getting you higher Brix and improved Crop Yields and Return Bloom on Apples and All Tree Fruits and Blues & Grapes & all Cane & Bramble Crops.... You will see blatant positive differences compared to your UnTreated Check.... like the Big-Chlorophyll Dark Green Happy Foliage...

I Repeat:

The Standard Program for like on Apples---All 1 Pint-per-Acre-Applns....

1.-Pink---2.-Petal Fall---3.-2nd Cover---4.-20 Da.PreHarvest---5.-Post-Harvest.

And... All of Your Blow-By from these Foliars hits the Soil increasing all of your Microbial Activity... 🍷🍷

And... Here at Reisters, we sell the VitaZyme about 20% cheaper than anywhere else in the Land....close to 40% less than parts of the California Market. 🍷🍷🍷

****** Q & A ...Yes.... Our GreenFeed-27** can indeed Tank-Mix very nice with our Redox Nutritionals..... a "Match made in Heaven" some Guys say.

And ...that GreenFeed is all very Soluble ready for Plant-Uptake...

The way the Plant see's it... One [1] Gal. is better than 17 Lb. Actual-"N" applied to the Ground.

Thats like 37 lb.Urea.... or over 100 Lbs 15.5-0-0-19Ca-CalciumNitrate. Even a frequent 1-Qt-Ac-Rate of GreenFeed makes any Crop do much better....for less than **\$4 !!!**

As my Ol Dear Friend, the Late Charlie Paul used to say about "**Pabst Blue Ribbon**"...

"Ronnie, I dont know how they can make it so good, and sell it so cheap." 🍷

****** Phoenix Calcium "Soil Amendment"** is a Calcium Carbonate "Hi-Cal-Lime-Slurry"

.....and Yes you can Spray it right over the top of the Crop.... All Crops--Any Crop. Some Guys that have done the Before & After "Fruit-Tissue-Analysis"...along with some renowned Researchers, have proven that the Calcium Levels in the Fruit or Vegetable bump up considerably after a Phoenix Appln.

Full Production Size Blues Bushes, and most of the Apple Blocks around the Ridge Area would want 2-3 Qt-Acre. If you have some bigger Trees, do 4 Qt.

14050 Fruit Ridge Ave

And....Interestingly, Some Guys that have worked with Phoenix for several Years, stopped all traditional 'Liming' Apps 7-8-9 Years ago. It's heart-warming-amazing to me when considering the elimination of lots & lots of Bulk Spreaders of Granular Fertilizers and Lime from so many Farm Operations in the last several Years.

******Lots of Fervent Prayers goin Up right now for Kate Ivison....**

Daughter of our Friends Adella and John Ivison -- NewYork....

Kate has a Cancer Relapse...🙏😞 But...Our God Wins... and God loves Kate...

****** MagnaBonCS 2005** Systemic Copper Bactericide & Fungicide.... Yes ...Zero [0] Da.PHI... on most all Crops except Peaches.

The **Blues** Boys have proven they get much better Shelf-Life-Storageability if they do 16 - 24 oz-Ac-"**005**"1 or 2 Days before Harvest.

****** Yup ... I'll Repeat Being "ReActed"** is not the same thing as Being "**ReActed**" ...

When a Fertilizer Manufacturer takes a Mined Phosphate and a Mined Potassium and processes them into a nifty Granular Product.... like M.A.P., that goes thru Planters and Bulk Spreaders so nicely...??? That is certainly called a "Reacted" Product.

When Redox makes us a Hi-Carbon-Soluble-Nutrition that is completely-100% Plant-Uptake-Ready.....???? That is a very Hi-Tec-Top-Secret-Process being done in the only Plant-Nutrition-Based-I.S.O.-9001-Certified-Manufacturing Facility in the world. That is a whole different plateau of the "Reaction-Process"

A facility like this is like they use to Manufacture Synthetic Chemicals. They Legally have to. Nobody in the Nutrition Bizz has this except Redox. And because of this Process, no other Nutrition-Program that makes the "Hi-Carbon" Claim can be compared to Redox... and Lots & lots of 'Side-X-Sides' prove it.

And..... Redox here - Michigan ... is only available Here--Reisters.

****** Three Weeks 3 Weeks** from this coming Friday is our **2019 Fruit Ridge Fest....**

Lookn Forward to seeing a Bunch of You here. July 26

****** Yes....Again.... Go to "Reisters.Net" Home Page** and Clic on "Fruit Ridge Notes"

....and you'll find acupla hundred FRNotes archived.... Going back to March--2017

Checking back to '17 and '18 ...and looking at our relative Time-Frame-Apprx-Degree-Days can be a good way to see some timely reminders that I may not have mentioned this year.

****** Lookn at Alicandros "agr.news" Sounds like the N.Y. Apple Crop** is over-all fair-good.

Honeys = FairMinnieska [Sweet Tango] = Very Good Gala = Fair Empire = Light

JonaGold = Medium-FairCorts & RedCorts = PoorCrispins = Way Off-Small Crop...

....Good Crop of Romes.

I Have a 3-Hour-Dental Appointment this Afternoon 🙏😞😞😞😞🙏
