Fruit Ridge Notes  
from Ron Reister  
C.C.A.

## Fruit Ridge Notes - Wednesday - September 25 - 2019

**...25th ...Only 3 Months til Christmas ....**

**I hope to be able to send you some Photos...**

of some recent Visits-Discussions Referencing...

**\*\*Some** New-Blues-Plantings ...Where the Grower planted right-into the existing chewed-up-Rotavated 'Row-Crown' ...instead of the 'Middle'

....

The old-chewed-up Planting was 70+Years Old. The New Planting is doing Xtreme-Huge-Well. The fantastic Roots & Plant Health ... ?? ... We are crediting to the Agrinos "**InVigorate**" and the Redox "**H-85**" Combo. The Microbial-Activity just goes crazy!

.....and

**\*\*Some** HoneyCrisp Orchards.... Very Well Cropped Honeys... just Beautiful Honeys ... Packing Out ++100++%% ...on a \$54 - \$70 Market. Amazing ....

The per-Acre-Return is like....embarrassing to talk about.

....Workn on the Photos.

**\*\*\*\* These Guys** using the Agrinos Products for huge increases in Soil-Microbial-Activity...

Rule-of-Thumb.... a really good Agrinos-Product-Strategy is costing them maybe \$50-Season. I seriously know about some other 'Program-Strategies' that arent doing much...doing little compared to Agrinos.... But... Costing around \$250-Ac-out of the Growers Pocket. Very Ugly.

**\*\*\*\* Some Q & A**

...All the Following Issues ...Answers are Yes-Affirmative... and Thnx So Much for the Inquiry ...

**+Phoenix** Calcium is indeed available in Totes. You Guys that have been replacing the old Traditional-Hi-Cal-Liming-Task with this Spray-On-HiCal-Phoenix...usually do 2-3-4 Qts into the WeedControl-Strip. One Tote treats about 300 Ac-One-App.

**+Paraquat 3SL**...OrderDeadLine=Nov.14...Yes-Available in Totes.

**+BlackLabel.28.25** ...Is the same basic 'Phite' as FormulaII-SW and Formula I... Very Top-Shelf-Phite. And we do have some left.

**+VitaZyme** in Totes... Indeed...and Remember there is also the the vitaZyme"Organic"Label...

Use "Post" always...but especially where Tress were  
Cropped Heavy  
**+By-All-Means**--For Sure I would be having ORO-Boost or ORO-  
RZ or WetCit or Vintre in the Herbicide-Tank  
wherever I had any really stubborn-Hard-to-Kill  
Targets...especially when they are becoming 'Herbicide-Resistant' ...  
**+That Tank-Mix on Fuji** ...for a lot better Luck with Red Color =  
\*1 Qt Blush 2X + \*1 Qt SeaWeed + \*1-2Lb.DiKaP ...  
??? Hmmm...I'd say about \$100...???-Acre.... Not  
cheap... But I hear green Fuji are really cheap.  
**+Zn+Boron** mainly for Healthy-Over-Wintering-Fruit-  
Buds... \*PostHarvest \*Pink \*PetalFall

-- Best Regards....
