Fruit Ridge Notes - Monday - July 6 - 2020

**Greetings !!!! Hoping You All had a chance to
Enjoy Celebrating our Independence Day !!!!
....and Beat-the-Heat ...???**

Wow.... Warm Doesn't look like we're gonna break any Records....But
doggone warm.

WunderGround 10-Day.... 8 for 10 with Sun... 50% Chance of T-Storms
Thursday PM thru Friday.

.....Four Days Mid-Hi-80*s with 6 Days Lo-90*s.
10-Day NightTime Lows Avg all Hi-60*s.

****** Critical Reminder...** We gotta be crankin up Sprayers around
MidNight-1am.... and Gotta be done by 9am...
Most ForeCasters give the Expected-Hourly-Temps in the
Forecast... Staying under 80* is very important.

****** All Insect Pests...Especially Mites...** Love this Heat just as
much as I don't.....

But....Haven't heard from anyone yet about ERMs breaking thru the
AgriMek Program...??

Please let me know whats up at your place...especially if it's a Break-
Thru... ERMs comin thru whatever Program... Please let me know. Reply
on this...or Text or Call me 616.437.0073.....

No matter your earlier Program, if you have a 'Break-Thru' you cannot
ignore it in this climate... Where you have a really good Crop-Set...???
Those Tress are stressed enuf in this heat & serious drought... If you
havent done AgriMek...or only did 1 App...?? Get goin with another
App @ 20 oz-Ac...Use with 4-Pints-per-100-Gal--InSpray-90. 28-Da-
P.H.I.... Allowed 2 Apps ...allowed 40 oz-Ac-Season.Total...

******Ya Know.... Since that Big-Rain-Event June 10....**

We've only got like 3/4 Inch at Sparta North Station... 😞 😞

****** There's Lots of New Apple Trees around West Central
Michigan....**

.....that were delivered here and planted in the last 3-4
Months.... and then they exposed themselves as being Carriers of a Fire
Blight Strain that is Strep Resistant 🤯....Alot of Trees. 😞 DeJaVu all over
again....??

This happened Big-Time-Awful just 4-5 Years ago...??? ...and I've heard new Rumors of Repeat every Year since... This BullCrap is all compliments of some PNW Nurseries... Some Ridge Guys think its a Conspiracy... 😞

Over the Years Many Folks have brought those Youngns thru this Xtream-Hi-Risk-Deadly-Fiasco with the Butt-Kickn **"1-2-3"**.... at least one-Appln-per-Week.

The **"1-2-3"** is a Combo-Tank-Mix of **1** Pint **"005"** plus **2** pint Regalia plus **3** Pint FormulaII-SW... This is a Per-Acre-Strategy where the Symptoms are already there.

Where you have no Symptoms, you can dial-down to your appropriate TRV.

Also...Since our discovery of **SAver**, most Folks are doing the SAver, substituting for the Regalia...

Both work as SARs.

I love Regalia because it has helped save Thousands of Acres of Beautiful Young Blocks...

..... But...Regalia=2 Pts=**\$17**....SAver 2 pts=**\$7.40**..... Two separate approaches to Systemic Acquired Response [SAR]... Both are wonderful.

Also....Several Smart-Money Guys use a much bigger Rate of Formula-II-SW...or K-Phite-7LP... the Super-Phites... Instead of 3 Pints they do 3 Qts...

And some more Smart-Money Guys successfully saving their New-Young-Blocks also have 1 lb.-Ac-DiKaP in the Mix...

**** **Q&A...Yup**...LunaSensation at 5.6 oz-Ac on Sweets is
G/E-on Brown Rot and LeafSpot...\$35
Merivon at 6.7 oz-Ac -- Sweets --
G/E - Brown Rot & Leaf Spot ... \$45

**** **I See Alicandro again Warning** his Disciples about using any Ethephon ahead of any **85°F-Plus-Days**... Around here....If WunderGround and the majority of ForeCasters are right, just dont do it....for at least 12-14 Days...

Jeff also says on Tarts you will see some ugly Defoliation and very severe Gummosis....if Ethephon is applied in extreme Heat... Also... Jeff says Wayne-County-New Yorkers have now joined the Club of **"Strep-Resistance"** ...Really scouted for but only scarcely suspected til right now....Cornell has confirmed the discovery in WayneCounty.

Locked & Loaded.... and Tryin to Stay Cool....
