Fruit Ridge Notes - Monday - Sept. 23 - 2019

Hello and Happy Monday from Sunny Fruit Ridge Ave...

..... On this **1st Day of Fall...**

****** Q&A...Yup...The Boron & Zinc...** are Also Key-Components in the Post-Harvest-Appln.

If you do the Redox TriPlexMicro 👍...You are Covered for these ...Plus Mn & Moly & Iron & Cu

....and Also ...

And...the Great Traditional Options—for Zinc & Boron....

For Lots-of-Years...Most of You have done the **ZincRush and the Boron-Xtra** from our Fresno Pal Patrick....

..... The MSU Kid... Owner of Custom Ag-Formulators...

You've done these in Your 'Post-Harvest'... **Still Excellent !!!** ...

2 Qts-ZnRush Plus 10- 15 oz.BoronXtra.

And...Keep in mind as you Order

You will want to do this Boron+Zinc Appln again also in the

Spring... **Pink & **Petal Fall. So...Keep unused portions high & dry...

And ...don't use any excessively huge Per-Ac-Rates... Always 'Spoon-Feed'
... Never Shovel.

****** Blush 2X...** Works Really Xtra-Good where Some of You & the N.Y. Guys have Tank-Mixed a "Marine-Extract-BioStimulant"

.... A Bunch of NewYork Pals Tank-Mix these regularly.

One [1] Quart "Establish" or "KelPak" per acre with your 1 Qt.-Blush 2X

....and 1-2 Lb. DiKaP... Amazing Combo.

Alicandro says this works really good on Braeburn—Fuji—JonaGold—Idas
...I'm thinkn also on your new Late-Season-HoneyCrisp Relatives...??

Reminder—This new Blush 2X is Twice as Potent as the Original.

Several of You have tried different Application-Time-Frames for Blush

....and I am Impressed. But the actual Labeled Timing is like 28 Da.Prior to anticipated Harvest ...Then Repeat if Ya want 2 weeks later. Always take your Blush 2X more seriously wherever you use ReTain...It seriously helps to offset the "ColorDrag" ...
