## Fruit Ridge Notes - Tuesday - July 30 - 2019

### Hello Friends ..... What a Really Nice Day ...

I Heard the Experts saying we can expect some very Nice-Low-Humidity Days and Cool nights for awhile.....  
The Wind is supposed to be easy-4 - 8 mph til next Monday ....and Tuesday next is the 1st chance of any Rain....???  
Thats just WunderGround opinion ....

\*\*\*\* **Parka .... Yup...** the 1st App was at 100% Petal-Fall...Like Tiny-Fruits....No more Bloom....  
...then the 2nd and Final Appln were at +++21-30 Day intervals...

So like on most Varieties that last App was aprx last week...???  
And it for sure does not hurt anything, and will certainly help, if you want to do a 4th Appln.... aprx 25 Days after the 3rd App.

This stuff seriously prevents Cracking--Flecking--Russet--SunScald--SunBurn ....on your Hi-Dollar Varieties.....  
And most faithful-serious-Users claim a significant Color-Bump. We do highly recommend the Blush with your later Applns.

\*\*\*\* **Redox** Guys are getting 1 - 2 lbs - Acre DiKaP on now.

\*\*\*\* **Q & A--**Yes....That Golf Classic--Aug. 24th....Checks payable to Sparta Lions Club-- 83 W.Division St.--Sparta--49345  
.....and you are correct....our dear Pal Walt went to his Heavenly Home in March--2016....  
.....and "Moss Ridge Golf Club" is at 13545 Apple Ave., Ravenna - 49451 ....Very Cool...Check it out ...."[www.mossridge.com](http://www.mossridge.com)"  
Todd Johnsons Ph. again == 616-318-1619

\*\*\*\* **Please expect to see some *Special*-Fruit-Ridge-Notes** coming soon.....

I have had a lot of inquiries referencing the Redox Nutrient Strategy..... and there is just so much to consider, that I want to make a Special-Alert-Type Notes just about Details related to specific Redox Technology.

Acupla Weeks back I met with some industry Associates ...One of them is about my age.... He's been in the Game a long long time. He happens to read the FRNotes on a regular basis. He told me that we have 2 "DKP" products in our Inventory Offerings. He says there are only maybe 4 or 5 Plants in the world that can make those.... He said that we are very likely the only Distribution Business that carries 2 of these. He also said the the BNRs have Zero [-o-] that he knows of.

This Good'Ol Boy is very familiar with the unique "ReAction-Process" that is required to make a true "DKP" ... and knows how unique these Products are. He said some Sales Folks he has listened to, say they have a "DKP" product, when in reality they do not.

\*\*\*\* **Hmmmm... Wondering ...**How Many of Ya'll have Noticed this.... Alicandro see's a direct correlation between repeated Early & Overly-Aggressive Summer Pruning, and Chronic Black-Stem Borer Issues in M9/B9 Plantings....??

\*\*\*\* **Labeling .... Q & A ....** Yes....The Label on several of the Imidacloprids reference "Soil-Applns" .....

....And it is very important to know that all of those Apps count toward Your Total Seasonal-Limit of 16 oz-Ac of the "4F".... But ....In just about every Crop we work with, it seriously makes sense to max out your Limit doing Foliars...

.... like on Apples.... 5 Apps @ 3.2 oz-Ac... Why...??? All of your "Blow-By" hits that Soil.

\*\*\*\* **Feedback ....**Really Appreciate You Guys.....

Over the Weekend a Fave asked me if it wasn't time to "Change-Up" my "Signature-Box" Comments below...???

😊😁😏👍😎🙌 I'll work on that !!!! 😊😏

Happy Tuesday Evening .....r
