Fruit Ridge Notes - Tuesday - September 3 - 2019

Hey Friends

The WunderGround.... Says Still 50% chance of getting in on some Rain-ThunderStorms Today

...more Chances next Mon-Tues-Wednesday... Praying for no more Hail on Anyone.

**** **Yup** We can do "Thiophanate-Methyl" = **Topsin M** for SootyBlotch--FlySpeck right now....

But Check with your Fave Fruit Buyers first ...some really seriously prohibit using Topsin.

But yes we have it....sellin it to some Folks....

**** **Alpine Township - 10 - Ac - Apple Trial Block** Where we are *still* doing All the "'005'" Apps for Disease Controls....Since "1st-Crack-Green" ...All the way thru ...still doing them Only adding some Dirt-Cheap Tebuconazole [Elite--an old S.I.] into Apps early - for Mildew.... and then also at 5th & 6th Covers we added some of the new "**Fung-Out**" into the Tank-Mix so the Manufacturer-**AEF-Global** could see it Tank-Mixed with "'005'"and see if it makes any huge diff on Summer Diseases.... and to make sure it doesn't cause Russet when Tank-Mixed with "'005'"

So.....Algoma

No Scab

No Russet

No Summer Diseases

No Phyto Lookn Great Beautiful

And... 10-Ac-Trial-Block-Gooding....

*Plenty of Scab on Fruit [Red Dels]**None** on Foliage.

*Russet on Fruit ...Due to our Diazinon Apps....

We didnt do the Diazinon at Algoma Twnshp.

*No Phyto

*No Summer Diseases

Remember me mentioning my Expert-Pals that told me early on about the Systemic-"005" maybe not working on Fruit Tissue like it does on Leaf-Tissue...???...OK then....So what about the Algoma Block...??? Seems to be working just fine there

TechnicallyIf you really look close.... You and some Experts will likely conclude that the "'005'" is controlling all the Bacterial and Fungal Diseases that Apple Guys deal with ... a total of like 15 or more Diseases. And I have Grain Crop and Vegetable Grower Guys telling me the same thing.
Me...?? I think that is likely correct 95% of the time....but I have seen some cases where certain Bacterial Diseases have come thru it in Tomato.....

..... To Be Continued

******Remember** Those Guys that do CS2005 from MagnaBon at Pre-Harvest for Storage Rot Controls ...??? They just keep right on doin it..

....Kinda tells me they're seeing no 'ill-effects' ...like Russet...?? ... No Russet.

Try iton some Variety that's goin into Storage for Process.....??? ...Just to see for yourself... Walk before Ya Run....

Merivon also makes this claim....👍 ...for Storage Rots.... 5 oz-ac....0 Da.PHI... \$32

{1 Pint "005" = \$8} 0 Da.PHI

****** If You still have 2ndary Scab** looking still alive....??? Keep your Captan 80WDG - 5 Lb-Ac. in the Mix.
Spike the Mix with one of these maybe...??? ...for improved control SummerDisease and Storage Rots...

- 14 Da.PHI Flint Extra
- 14 Da.PHI Indar
- 14 Da.PHI InspireSuper
- 14 Da.PHI LunaSensation
- 00 Da.PHI Merivon
- 00 Da.PHI CS2005

Have a Safe Short-Week....
