Fruit Ridge Notes - Monday - June 3 -2019

Hello from Sunny & Mid-60s* Fruit Ridge Ave....

**And it's not really very Windy out here.....8 mph
maybe...???**

Tomorrow is supposed to be Windy--Mid-Day---15 mph... But then
Wedn-Thrs-Friday very light Winds. 👍

******MSU-Amy is still catching Spores.**

We will like need **2** Rain Events to know for sure that we are Done with
Primary for 2019... Maybe **3**.....

Expecting more Spore Discharge with the Next one.

Kinda looks like we will be in line with "Average" Calendar Date to be
Officially done.... ???

Amy caught a Huge Amount of Secondary Spores in the early Sa. June 1st
Rain.

We must really carefully watch now for any Secondary Scab Symptoms ...

Secondary Scab is seriously ugly to deal with. The Infection Periods only
need 1/2 the Hours of Wet to spread all over.

******Q & A - Yup -- All of the "NAA" Products....** *Refine 3.5WSG.

Refine 3.5L, Pomaxa, Fruitone L, Fruitone N....

All are **oz. : oz. : oz. : oz. the same "4 oz. per 100 Gal gets
You 10 PPM" ... All the Same.**

Why is Reisters **Refine 3.5 WSG** so much better than all the other
Choices...??? Its just less "Cost-per-Acre" ...It doesn't perform any more
or any less. But you have enuf \$\$ left to buy a Cold

Beverage. 👍 😊 😊 ... I love it when "Fine-Americas" is Buyin !!!

******MSU-Amy--Announced a Special Fremont Area Grower**

Meeting ...Talk about Thinning & Whatever else comes up.

Roossincks--Baseline Rd--Fremont--4p - 6p Thurs--June 6

******6BA...The Exilis 9.5 SC is the Concentrated one.**

I dont think there's any old original "ExilisPlus" in

Michigan...??? Unless you've had it on your shelf a year or 2...???

The New 9.5 SC is like 5 Times Stronger than the old Original....the Old
one is the same strength as the Maxcel product...???

New 9.5 SC Exilis = 12.8 oz. per 100 Ga. gets you 100 PPM

******Yes ...We have Sevin** the 4L / XLR...We even have some of the Original "50W" Sevin in 5 Lb.Bags.

******Remember to be Careful of High Temps** following a Thinning Appln. Almost every time Big Heat really increases the Thinning Performance of the Chem-Product you used.

**** **"Quote of the Day"** ... A **Beauty...** by Jeff **Alicandro**.

"Spraying your non-bearing Apple Blocks *"every-so-often"* with *"whatever's left in the Tank"* will very likely lead to many more years of spraying those still non-bearing blocks *"every-so-often"* with *"whatever's left in the Tank"* ... 😊 😊 👍

Jeff is trying to get Guys to be very aggressive in these Young Blocks for Controlling.... Weeds... Scab & Mildew ... FireBlight, Potato LeafHoppers, Aphids and Borers. He has seen it where Growers are harvesting 2 years earlier on young blocks where they really watch the Pest issues. And it's really Low-Cost-Cheap to do that.

**** **Grapes - PreBloom ... Question on Movento** It's actually Labeled for MealyBug, WhiteFly, Mites and Scale & Gall Maker But for right now MSU-E-154 says it's the time for the "Grape Tumid GallMaker"...and E154 says Movento is excellent for that ... But it doesnt rate it for the Beetles & Chafers & Hoppers that are to be controlled right now.... and those Pests are not claimed on the Movento Label. And that 6 oz-Ac-Rate is about \$40 ...???and no 'generic' yet ...

******You Sweet Cherry Guys..... Aluminum Ladders Yup** - We have the "Strathmore-Super-Duty" Aluminum....

Have a Safe & Productive WeekHopefully No Rain this Week r
