## Fruit Ridge Notes - Friday - September 13th - 2019

**Greetings .... It's Friday the 13th ... And It Comes Along With a Full-Harvest-Moon Tonight .... ????**

*Some are expecting some Excitement & Bizarre Strangeness....????*

But..... I guess I have never really noticed....???

One of these Combo's happened 19 Years ago...and will occur again in 29 Years I think they said....??

**I Dumped Out over 3 Inches** at Gooding St...Thats from the last 48 Hours... Kinda soggy ....

**\*\*\*\*Q & A ....Yes....Blues** Boys should certainly do a ElCheapo-LowCost-Butt-Kickr Insecticide for

SWDs in that Post-Harvest Tank. Just Kill'Em.... any chance you get. You can do this for like \$3-\$4-\$5--Acre.... Just Kill 'Em....

**\*\*\*\*One of My Fave** Smart Money Guys told me that he and a few of his Neighbor Pals are applying a 1/4 - 1/3 Rate ReTain on **Gala** Right Now...following all the Rain... Emphasis on "Right Now" ...to Prevent Cracking. It has worked well for them in the past.

**\*\*\*\*Thinkn Ahead.... When you get a Second...**Take a peek at the Herbicide-Shelf in the Spray-Shed... Planning a Post-Harvest-Weed-Control-Appln really makes serious sense.... Your Early-Spring is always *Balls-to-the-Wall-Busy....* to use a Aeronautical Term....[???Google It]

And, this Trip can afford you an opportunity to get some Fall-Nutrient into that Soil.... All the "Right-Stuff".... Plenty of Redox Strategy Choices to fit into your needs.... All Tank-Mix just fine with our Herbicides.

And Deer Huntin doesn't start til Nov.15th...

Where certain BroadLeaf-Weeds are becoming a real issue in Apples....Use big-rate-2-3 Pints-Ac. Amine2,4-D... Tank-Mixed with medium-big-rate [2 oz]Aim.

Remember that Fall is the time to do your good ol' Simazine, as it has a "**150-Da.-PHI**"...

....which makes it a toughie in the Spring....with FireBlight--Scab--Brush from Trimming--TreePlanting---Issues...

Some **Blues** Boys need to have a 2 oz-Ac-Rate Aim2EC in the Mix...This Fall...and again in early Spring... Blues **DO NOT** like any 2,4-Ds....

.....There are plenty of XtremeLowCost Options to employ.... Lets Talk.

**\*\*\*\*Alicandro** is Telling his Guys to be Watchful for B.M.StinkerBugs in Blocks nearby any SoyBean Fields .... Jeff is suggesting a special PreHarvest-Appln especially on your Fuji & EverCrisp... The BMSB-Damage resembles 'Bitter-Pit' ...and None of the Fresh-Packers or the Processors are very tolerant of any of these symptoms.
