# Fruit Ridge Notes

*Fruit Ridge Notes from Ron Reister C.C.A.*

## Fruit Ridge Notes - Tuesday - June 2 - 2020

**Wow----Gorgeous Day --- Gooding St --- 6 Miles West of Beautiful DownTown Sparta...😎 Hangn at the "Home"Office...**

**And...**Lookn at the *LongRange* --- SunShine 7 out of next 10 Days...
Chance of Precip tomorrow Morning...and next Tuesday-Wednesday...
...Kinda Windy Tonight-Early Tomorrow....then a bit easier for a week.
**And** ....Lots of Great Discussion...Feed-Back...Input Yesterday & This Morning !!!👍🤗
**** **That Splash** Last Eve only stayed Wet for 5 Hours here ...??? No Sweat .....
**** **A Horse-Hay-Grower-Pal.....** having a **Manganese** Deficiency.... The Best **Mn** Choice I have ever found.... is a Complex of several Key-Components... All ReActed Plant Nutrients ....Soluble... Crazy fast Leaf-Absorption ... Roots get a big dose and they just love it... This Product is Complexed from Carbon-Based Reactions...
Contains ***6%Mn.. 2%B.. 6%Fe.. 2%Cu.. 6%Zn.. with a poke of Moly[Mo]*** ....
He's gonna use 1-2 Lbs-Ac.of this **Triplex Micro**... the Cost is less than the other Laughable Kool-Aid 😂from down-the-street...**24 oz.=$17**.... Out-Performs all other Recs from Whoever... All of them... for 1/2 the Costs. Im using his Cost-Factors that he was Quoted.... The other Excellent Choice is "**Triplex Manganese**" ...a **23% Mn** without all the other Goodies... Again ....One+1/2 Lbs is **$17-Acre**...gets you nearly 4X the Mn...but ....No other very serious-Nutritional Components... Its all Good🤗
****Apple-Grower-Pals..... Be Checkn Your Shelf for **ViroSoft-CP-4** BioControl for Codling Moth.... Comes in Quarts...
Do 2 Oz-Ac-Alt-Center....with the other Center 7 Da-Out....Then Repeat ....so you end up getting a total of 4 oz-Acre.
Timing coming up.... 250DD after CM-BioFix...
A SprdrStckr helps....But if you are going into the 'Normal' Tank-Mix, you already have that in the Tank.
**** **Thinning Apples...**

++Yup--We Tank-Mix our Petal-Fall-App with our Thinning-Efforts.
Remember your InSpray-90 in you Tank will enhance your Thinning-Agent-Capabilities.
++New-Very-Young-Blocks where you want Zero[-0-] Fruit...2-3 Pint Sevin-Carbaryl plus Exilis 9.5SC [6BA] @ 1 Pint-100-Ga.=125 ppm.
Be sure your CS2005 is also in this Tank.
++Avoid NAA on the Young-New-Trees...It stunts the Tree-Growth...
and NAA is also helping next years 'Fruit-Bud-Set'...🙄
++Most All Thinners dry on & are absorbed by the Foliage good enuf within a few Hours.
++The New "'Exilis 9.5SC"' is FiveTimes [5X] more A.I....5 Times Stronger than the good ol ExilisPlus.
The Old "Plus" is the same "A.I.Strength" as Maxcel.
++The Experts Remind us of the Effectiveness of "'ReWettings"' with Thinners.... If you get a Rain soon after your Appln has dried on, you will likely get some additional Thinning....
++Kinda Nervous...Pretty Sketchy Crop..😉...Then, be sure to make your attempt when the ForeCasted Temps are **Not** crazy **Hot**..

****** Important for Those Beautiful-NonBearing-Young-Hi-Inve$tment-Block$....**
Be sure to have 8oz.Low-Cost-Teb45DF [Elite] -Acre in the Tank-Mix with your 1 Pt '"**005**"'and your 8-12 oz. **Exilis 9.5SC** and your 2-3 Pint **Sevin**...

****** Correct...Save Your PermUp & Pounce** [Permethrin].... Not for use after Petal-Fall ....Lots & Lots of other great Low-Cost-Effective '"**Roids**"' to choose from for after Peatal-Fall....
Like...+LambdaCy 1EC... +Asana... +Baythroid... +MustangMaxx... 😉More...
I would be having any Left-Over PermUp/Pounce in my Tank-Mix going on my Non-Bearing Young Stuff ...???
.....if I didn't want to leave it on the Shelf 😉...???

******'"GWA"'....Gallon-Water-Acre....** Guys that started with 15-18 GWA are now Blowing thru all the new lush Foliage with 35-40 GWA. Guys that started with 40 have went to 75 GWA.... All depends on your TRV.
Remember to keep the Kudos in the Tank-Mix....Really works to prevent a bunch 20-30-40 Inch-Shoot-Growth. Doing 2-3-4 oz-Ac---4-5-6 Applns makes a Huuuuge Difference.... Huge.

****** Also..... The '"Rule-of-Thumb"'** for **OxiDate 5.0**==2 Qts-per-100-Gal-Water. This stuff is a "Non-Selective-Bactericide-Fungicide".... When it hits the Target it Kills all Pathogens.

Pal Jeff Alicandro says about Thinning...."**'"Ramping Up my Self-Medication Regimen Helps."'**
**My Brother Bob used to say that same thing**...😂😎

**Stay Safe ..... Locked & Loaded .....**
