Fruit Ridge Notes - Monday - June 29 - 2020

Greetings..... Happy Monday

Wow.... Those of You that Look frequently at the Various 'Weather-Fore-Casting-Services'.... ???

Check Out "'WunderGround'" **10-Day**.... All **90*-96***F Days... All... ☹️
....the Avg-Night-Time-Lows = 68°F !!!

...and **10 for 10** Days with SunShine.

And Yet.... **Nuthin New**....

....the Familiar-Expression "'Summers like when I was a Kid'" is heard often.

If we do really get 10 Days straight of over 90°F...It will tie a Record nearly 80 Years Old...??? ☹️ The Real Record-Keeping & Science has said this stuff is an OnGoing-Cycle.

**** **Feed-Back ...Yup...** In this Kinda Weather... ??? That 1-Qt-Ac-Paraquat **3SL** will quite likely have its target turned Brown by the time it takes you to get to the end of the Row...??? 😊

But

Don't depend on 1-Qt-Gramoxone-2SL to do that... ☹️ I know you likely paid too much for that 2SL...??? And I know the Label says "1-Qt"... But ya still gotta do 3-4 pints... Unless you put a big dose of Oro-Agri Vintre or WetCit with it...??? ☹️

**** **All Spray-Applns Nowadays...** On just about every Crop I can think of...???

....Need to be applied at **Between 11pm and 7am**.... It's just so fiercely **Hot**....

**** **Timing for Glyphosate-Apps...** There is plenty of documentation proving that a **5am**-Appln-Glyphosate works Waaay-Huge-Better than a 5pm-Appln... The Target just takes it all in extremely better. Not gonna happen 5pm-90°F-SunShine-Dry-Day... The Documentation started apprx 7 years back in Row-Crops in the I-States...

**** **Q&A...Yup---But---** Remember....

That "'**Da.P.H.I.-Issue**'" only matters where you are "Harvesting"...

In these Gorgeous-Young-Hi-Investment-Hi-Density-Hi-Intensity-Hi-Value-Variety Blocks.... Just keep on doin what ya gotta do against **F.Blight**... and all the other Pests we have discussed... Its Cheap.

Wherever you're Irrigating there's a bunch of very Green-Lush-Growth.... establishing F.B. Vulnerability.... Susceptibility...

**** **The Enemy-Insects Reeeally Like** the Warm Nights.... and they don't really mind the Hot Days...

But Hey... This On-Going-Hot-Dry is actually a Friend to the Guys fighting 2ndary-Scab... That is if they also have Irrigation...

**** **SWD-Hi-Risk-Crops** Raspberry - Blueberry - Sweets - Tarts - Strawberry - Plums - Prunes - Peaches - Grapes... **and....**

Remember... in the last 2 years....Some Guys have found SWD-Fruit-Damage while lookn at ""Zero"" Trap-Counts.

When we know there are SWD Flies in the general area, it's passed-time to be Kill'nEm... and just **Keep-On Kill'nEm.**

I know **Blues** Boys that just simply go every 5 Days...No Exceptions....sometimes tighter.... Because getting a Truck-Load of Blues rejected for SWD-Content is not an option. That Market is ugly enuf without any major costly Set-Backs.... **And ...**

Remember Imidan is a very very good SWD-Tool....But....**Not** on Sweets.

And.... The SWD-Killn-Insecticide-Tools are mostly very-Low-Cost-Cheap-Hi-Efficacy.... it costs more for the Rig-Fuel- & Driver-Hours than it does for the SWD-Killers.

And....Most Folks don't even want any SWD-Larvae-Juice in their BlueBerry Wine...so just Keep Kill'nEm...

**** **Yup--**Thats Correct ...**RGSs** Fruit Ridge Office-Warehouse will be **Closed** this **Friday--July 3rd.** I will be Letting You knowmaybe tomorrow.... about Who to Call if You have an unexpected development-emergency situation over that Friday-Saturday-Holiday-WeekEnd-Stretch...

Lookin Ahead....

...**RGSs** is Hoping You can Take some Time in the Shade this coming **July-4th-Holiday** WeekEnd.... 😊☐☐😊

Locked & Loaded....
