Fruit Ridge Notes  
from Ron Reister  
C.C.A.

## Fruit Ridge Notes - Friday - September 6 - 2019

**Wishing Ya'll a Blessed Friday ...** from the Reisters ....

Pretty Cloudy & Cool here at Fruit Ridge..... Not gonna make 70\* today ...

The most significant chance of Precip according to WunderGround is gonna be next Tues-Wednes-Thurs-Friday.

\*\*\*\* **If You would Like for Jim Kruger--Fine Americas** to come see You with the "DA-Meter" ...???

...to help determine your best Timing for Blush 2X to be applied to your Fuji or other Varieties...???

**517-719-0323** will ring Jims Mobile-Phone.

\*\*\*\***The Apple Harvest Dates** here are All roughly 5-6 Days behind the Average-Normal .... and in N.Y. they are saying 7 Days behind.

\*\*\*\***Experts Say an Aggressive Kudos-PGR** Program seriously helps prevent BitterPit in Honeys. Anything that minimizes Vegetative Growth helps to minimize BitterPit.

I've am so happy with our "'4-App-Kudos-Trial'" where we had big Rates of our Fave Calciums in the Tank-Mix with the Kudos, going against the warnings on the Label, resulting in very pleasing performance by the Kudos. I can't believe how the New Growth in our Protocol-Blocks is a few Inches, and in other Close-By-Blocks it's a few Feet !!!

I know Next Spring and the following Years, we will be reminding Folks to start Calcium-Apps at Pink, and have a **2-3-4 oz-Ac-Kudos in the Tank** also..... Keeping the Kudos in the Mix til 1st Cover... or Later... Kudos = 45 Da.PHI--12 Hr.REI--Allowed 99 oz-Season--16 Apps-per-Season

\*\*\*\***Linda & I** made a couple "**Emergency-Deliveries**" yesterday ..... to the South West Corner.... Visited "Leitz Farms" Tomato Fresh Pack Operation...Wow.... Very Impressive.

And also Trever & Jason Meachums Operations in Hartford.  
Amazing. **Great Job Guys !!!** 🍌👍😊😎

\*\*\*\* **Q & A... Inquiry ....**about the Liq-SeniPhos advertisement with my brother Jims Photo and also a Photo of Nels Nyblad on it .... referencing success using Seniphos for getting better Red Color on Apples..... Yes---That was us.... FGR & Sons ....apprx 28 Years ago. We did that Trial for 3 years. The Photos depicted some increase in good Red Color, one year .... the other 2 years it was really hard to see the increase ...if there was any. But we thot that SeniPhos was a good Nutrient if nothing else, so why not.

Now.... Saying a big Thank You to many of you that keep on year after year proving to YourSelves that the DiKaP really consistently works to improve Red Color where you want it to. And of course bringing with it several other attributes. On larger Trees, Guys are using **2 lb DiKaP** with **1 Qt Blush 2X** ....per Acre.

\*\*\*\* **Q & A .... Trimming Honeys...** Yes.... Less is Better... Alicandro says both Dormant and Summer Pruning of Honeys needs to be very light.

And do a lot of Ca-Apps Early ...and Kudos Apps... Start Early....Pink.

Praying Blessings on Your WeekEnd !!!
