## **Fruit Ridge Notes - Wednesday - October 2 - 2019**

**Greetings Everyone!!**

**Huge Rain.... Ridiculous....**

**There's Water standing in places I havent seen it in Acupla Years... or more.**

**\*\*\*\*So...Several Folks are doing the Motivate**[Ethephon] on **Honeys** where

they had a very good Crop-Load...

I told them to be extra-special-Xtreme-Careful to not let any Drift get over onto Apples awaiting Harvest....It makes a very disgusting sorry mess.

Make sure you get some substantial Nutrition into that Tank also... That Big-Crop really stresses that Tree and the 2020 Fruit Buds.

**\*\*\*\* And what about those Blocks** where the Crop was way down... Certainly not much stress on that Tree... ????

OK..

So...If you are on the ol' traditional-Nutrition-Plan...where you poured on a bunch of \$\$\$Granular-N-P-K+Micro\$\$\$ early Season-2019...???

Lay off....

Dont Do a big Post-App-Effort... Dont do Motivate... But maybe just your 1 pint VitaZyme and a poke of ZincRush & BoronXtra...

OverAll...Lay Off.

But...Where You are on your Redox Strategy, Stay on your Attack-Plan. You're still already spending substantially less than the ol' traditional-methodology-Input-costs. Stay on Focus.

The Experts....the Wise Guys... tell me to 'Stay-the-Course' ....Keep your ZincRush & BoronXtra ...

or Redox-TriPlex-Micro... in the Tank  
\*\*PreBloom... \*\*PetalFall... \*\*Post Harvest...

If you did the Tissue or Sap Analysis, and it shows you have a radical Deficiency, Do More. Pretty simple.

**Reminder....Be sure to visit the "Market on the Ridge" October 4-5 ...this coming Friday and Saturday.**
