Fruit Ridge Notes - Tuesday - April 14 - 2020

Good Afternoon Doggone Cold out there 😞

For acupla hours early todayT'was Snow-Flurry in the air...
Including Today...WunderGround-ForeCasters claim we will get 8 Days
of kinda-Serious - Substantial SunShine 🙏😊👍👏😊 !!!
Temps ??? The Highs for 10 Days...Including Today ...

37*-38*-42*-46*-52*-51*-51*-57*-62*-57*
..and the Lows....26*-26*-29*-28*-40*-32*-32*-37*-44*-48*

😞 Those Highs are about 12* Colder than the Avg-Norm...??

And then way out 7-8 Days....Next week Wedn-Thurs---40% chance
Precip.....

...and... They're sayin the Wind is gonna stay 14-15mph-Stupid-Nuisance for
5-6 Days... 😞😞

...Its just pretty Doggone Cold for this ol man...

**** **Attended a Very Good Virtual-Factual-Info-Share via "Zoom"** this
8am.....

This one = **Redox "Blues"**

Had several Fave Blues-Grower-Pals attendingright from their own-Office-
Computer....or CellPhone....

We will be doing these quite a bit ...for All-Crops.... You interested...??? Please
tell me or the DeeTeam Just simply "Reply-All" on this....

Ya know.... This Redox-Strategy-Phenomenon continues to impress... and
not just only me....

Anybody that's seriously watching really intelligently watching Unbiased
watching is always impressed.

What is the Michigan-Blues-Per-Acre-Avg-Production-Tonnage...??? I'm not for
sure ... But I have heard in the past that its less than 5000 Lb...??? We have
Redox-Blues-Boys getting 15,000-Lbs-Acre...of excellent Quality Blues.

And Ya know.... Some Folks make the point that the Production-Cost-Per-Acre
is the Same where you're gettn 5000 Lb as it is where you're getting 15000
Lb.... Sometimes. But...Some of these Redox-Guys are using about 1/2 the
regular "Pesticide" per-Acre-Normal compared to Non-Redox-Production.

Some BNR-Reps call this stuff Fairy-Tales.....??? 😞 5000 Lb vs. 15000
Lb...??? We have the Proof... We have the Data

So.... I think I can see where Tinker Bell is...

**** **"S.A.s"**Yup Products that contain *Salicylic Acid*

These trigger the Target Plant to accelerate it's own production of its own
"Natural-Defense-Arsenal"

Researcher-Experts really like these... and so do we ...

These have been soundly proven to work doggone well.....

Some Products you are familiar with that affect the Tree-Bush-Plant in this way ...???

--Regalia ... --Actigard 50WG ... --SAver ... There are actually many great Products that do this "Job-Description" ...and some of them do not necessarily contain the "C7 H6 O3" which is the Chem-Make-Up of Salicylic Acid.

Listening to the *Real-Deal-Science*.... Other Products that help the Plants in this way are sometimes actually Nutritions... even some Nutritions that are Labeled as Bactericides-Fungicides.... Like Almost All of our Redox Products ...and our Fave-Phites do this Job Description. This helps explain how-why these Blues-Guys are able to cut way back on their Conventional-Pesticides. 😊🍏

I really like All-of-the-Above..... but I select the ones that are the most 'Value' when puttn together a Tank-Mix... *****My Favest--Incredible Performersfor very Low-Cost-per-Acre*****

**'SAver'.... **Redox-Products ... our Fave-Phites = **K-Phite-7LP & **Formula-II-SW....

All of these keep the Plant-Tree-Bush in Optimal-Fighting-Condition.... and....

My Favest are 15cents - 20cents-on-the-Dollar when compared to the Per-Acre-Cost of some of the Products I mentioned above.... Lets visit soon....

***** I Hear of Some Sales-Consultants....** Already trying to get Guys into a "Full-Rate" Appln of Fungicides like Merivon Luna Tranquility ... Aprovia and they still want a Big-Dose-Protectant in the Tank with it ... 🍏😞😞 ...???. So....like Over \$60-Acre...???

But Some Real-Deal-Experts look at those same Chemistries for when Growers get into a mess later, and need to deal with 2ndary Scab...???. ...and those Experts call the Results from those Chemistries "Costly...Frustrating...Only Marginally Effective" !!!!

If you think you might be in that Kinda 🤯HiPressureTrouble at this time...???!?!? Please consider

3 Lb. Each Captan80 & EBDC[Fortuna] and 1 Qt-CS2005... \$33....??2 Apps[4-Centers] ...

But....If you have kept up with Your Alternate-Center-Strategy since 1st-Crack-Green.... You shouldn't have any Issue.

***** Some of this Exposed 'Green' in the Apples... ???** In the old days they referred to this Growth Stage as "Squirrels-Ears" It appears some of those Squirrels got their ears froze off last night !!!!!?

The Sweets are puffed right out pretty good...but these Temps have All the stuff 'On Hold'

***** How Do You Market Your Sweets...???** So... If you don't involve a Processor...???. Look at Pg.164 --- MSU-E-154....

I'd be doin

1 Qt "005" ...

3 Pint Lorsban4E ...

8 oz. Teb45DF

3.2 oz. Imidacloprid 4F on between now and June 20.

And I'd be sure to get 5 Apps of

Talk Tomorrow....
