## Fruit Ridge Notes - Tuesday - 5-4-21

**Dear Friends .... Very Cool-Cloudy here currently... No Rain**

**WunderGround 10-Day...** saying SunShine 6 of 10

Days...tomorrow+Sa+Mon+Tues+Wedn+Thursday

Pretty good chance Rain Thurs+Fri+Sunday

High-Temps all in 50\*s til next Tu-Wedn-Thur...then Low-Mid 60\*s

.....**No** Scabbies yet... Is it dried-off at your place yet...????.... MSU-EnviroWeather '**Conklin-Wright**-Station' saying "OnGoing" as of 10 am... with 94% Progress-Toward-Infection... Staying Tuned....

.....**More** Damage Reports trickling in.... Most Ridge Locations looking fine...with some lower-spots kinda discouraging....

Looking for more Feed-Back from Pals in N.W.Michigan...

Guys are saying the Honeys didn't seem to come back very strong... 😞

.....**BumbleBees**....Are You in a situation where you wish you had more Bees in acupla Blocks.... Call DeeTeam ASAP.... They have some Extra-Quads you can get promptly... I always like to recall the Discussion with a Blues-Researcher... He told me a HoneyBee needs to visit a BlueberryBloom 14 - 21 times to get it done.... while a BumbleBee hits it once... DoneDeal... and the Bumbles will work in a 44°F-Light-Misting-Rain.... 😞

.....**Herbicide** Reminders.... Stay away from TreeFruits during the Early-Pink to Late-Petal-Fall Time-Frame... Some Products specifically tell us to **Not** use during the "Bloom-Time"..... Grapes & Tomatoes are highly susceptible to Drift..especially from 2,4-D.....

.....**Grapes** in the SW-Corner are just now getting enuf Green-Tissue exposed to do our 1st "'005" [2 pints] and Formula-**II-SW**...[3-4-5 Pints].... I'd also be doin the fullest-Rate-10.3 oz-Ac-Hero 2.13SC [a MustangMaxx-plus-Bigade PreMix] .... **or** the Fullest-Rate Brigade=6.4 oz-Ac plus 4 oz-Ac-MustangMaxx... Check your Shelf. Everything I am mentioning here is a serious-Hi-Efficacy-VeryLow-Cost-**Bargain**... I'd also have a 4-oz-Ac-Teb45DF in the Mix.... and if I have been plagued with serious Disease Issues...???...I'm also doing CapToZeb...Same Tank... All these GetAlong and Play very Nice together in this Tank-Mix...

**But....Don't try this** with any OlBlueSludge Coppers 🤖 or any LowGradeJunk Phites 🤖 🤖

.....**Some** Pals a bit nervous bout the 'Resistant' FBlight Inoculum...where the Strep will only partially work or maybe not work...??... Please consult with the MSU-Testing-Group that said you have Resistance.

Some Guys believe they still get their moneys worth, saying..."Strep is Cheap"

Again....If I have the "**005**" and the "**SA**ver" in the Tank... I rest a whole lot easier concerning FBlight. It just works.

Some other SAR-Type-Products are \$48 - \$60-per-Acre...???

...While a Pint-"**005**"==**\$8** .... 24 oz-"**SA**ver"==**\$5.25** ... The "SA" in SAver is actually an "Inert" ingredient....

.....**SA**ver is a very efficient "2-0-10" Front-Edge-Nutritional... Very Systemic...

.....**Q & A** .... The Formula-**II-SW** is actually the Formula-**I** but with SeaWeed added.... and they are both made the with the same incredible front-edge-Manufacturing Process as the K-Phite-7LP... There are no other Phites on the Market that are this clean and work this well.... and Tank-Mix so amiably with all the other Faves we like to have in the Tank. These 3 SuperPhites all cost about the same-per-Gallon... around \$28-Ga.... I recommend at least 3 Pints...\$10-per-Ac... Doing 6 - 8 Apps--Season.... These are Xtream-Systemic Super-Phites.... I Love these Hi-Performance SuperPhites !!!

.....**What** the Heck... '**Acronyx 4F**'...???... It's our current Fave "Imidacloprid".... Use **3.2 oz-Ac---5 Apps**-per-Season....

**Please**...!!!... Don't miss one of these 5 Apps... **\$2.33**-per-Ac-Cost... Annihilation of All Aphids...WALHopper....TLMiner....AMaggot.... and impressive suppression of SJScale...

**Q.** for Bonus Points...???...What was the Original "Imidacloprid"...???? **Provado**..... Bonus Points get you a Icy Cold Adult Beverage.... Stop-Up to Dads Barn....

**Stay Warm....Gods Peace ....Locked & Loaded....Always Intentionally Politically Incorrect On-Purpose....r**
