## Fruit Ridge Notes - Wednesday - June 19 - 2019

### **Greetings..... Another Good 7am-MSU-Swan Inn Meeting ...**

There's only 1 More left ...Next Wedn-26th---Last 7am-Swan-Meeting of the Season.

**Amy & Phil** do such a great job with these Meetings. What a huge Asset they are to All of us involved with Specialty Crops in the Ridge Area.... especially Apples.

#### **..... High-Lights ...**

- We are about 6 D.Days Base 50 Behind the Avg-Norm...
- Long Range Weather expected to be quite normal-average with maybe a bit more Rain
- Scab is actually technically still on... I feel we can expect to catch 5 - 10 Spores-per-Rod..... and to me...??? ... that means its done.
- There's plenty of activity with all the "Likely Suspects" Insects.... Cooler Temps translate lower Trap-Catches.... They're moving slower.
- SanJoseScale is much worse than ever in our History.... We seem to be getting a 3rd Generation the last CuplaYears....???
- Petal-Fall-Miticides look like they worked well.
- The normal most popular 'Return-Bloom-NAA-Program' is 3 Apps @ 5ppm at the 5th & 7th & 9th Week after Full Bloom.
- Sparta Station-Scab Infections--2019--so far: Sparta=8

\*\*\*\***Pushin 70\*F** here....Kent City... Radar Looks like the Rain will skirt around us for now.... Goin on 3pm and the Sun is Shining !!!!

\*\*\*\***This Cooler-Wetter-Rut** is not what the European Red Mites like... but they are steadily gaining, except where you have made a Miticide App.

I'm getting real good reviews on the Abamectin 0.15EC again this Season.... Love this stuff. **\$8.45-Ac.** And it also does several other serious Insect Pests... What a Bargain.

Be sure that you do the complete 2 Apps of 20 oz-Ac-Each when you do AgriMek / Abamectin 0.15EC ... and remember that there are now some other 'formulations' of the same Abamectin A.I. When something is so low-cost-cheap, the Big Guys have to try and find a way to get more money per acre from you...so they dream up different ways to 'muddy-the-waters'.... Just make sure you do the max-20oz-rate of the "0.15EC", and dont spend over \$8.45-Ac.

\*\*\*\* **Peaches ....** Yes .... "Tilt" is 41.8% Propiconazole. And you can do 5 Apps of 4 oz-Ac on Peaches.... with Zero [-o-] Da.P.H.I..... 12 Hr.REI. ....for \$2.26-Acre. Yes... I'd be doin this for sure ...Its one of those older Sterol Inhibitors. I'm not sure why it isn't mentioned earlier in the Program in E-154....???. Only mentioned at PreHarvest....?? Ask for Propicon.....  
There's a bunch of these out there ..... Just get one legal on Stone Fruits in MI.... keep it simple...just get it here.  
Zero Da.PHI on StoneFruits....and Strawberries.... 30 Da.PHI on Blues & CaneBerries.

\*\*\*\* **Sweets....** 8 oz-Ac-Teb45DF[Elite] = \$7.... o  
Da.PHI ....6 oz-Ac-Rally=\$17 ... 12 oz.Indar2F=\$26.67

\*\*\*\* **Grapes.... Actually...** You Guys *Cannot* do as much **Provolve** / Imidacloprid 4F as most Crops can.  
Only do **2** Apps @ 1.6 oz-Ac.[the Legal Limit].... That 1.6 oz.Ac. = **\$1.30** But .... Other Good Deals for Grapes...?? ...How bout Baythroid...  
3.2 oz-Ac = **\$4.23** ... Or 2.5 oz-Ac. Generic Assail  
"Azomar"=**\$8.85**... MustangMaxx-4 oz.-Ac.=**\$3.42**...  
The "Elite" [Tebuconazole] you're using...???. You can do 8 Apps - 4 oz-Ac. = **\$3.81-App** ...

\*\*\*\* **Those Tarts & Sweets** interplanted in the 10-Ac-Apple-Trial-Block east of my house continue to enjoy the weekly Dose of CS2005.... We will likely start the \*1-Full-Cover-every-2 Weeks\* Next Week...as we will be calling it quits on Primary Scab concerns. We will be doing 1 Alternate Center every Monday....getting a Complete Cover every 2 Weeks.

\*\*\*\* **If** You have any Empty Totes that we can Pick-Up next time thru...?? Pls let us know.

Warmest Regards.....r
