Fruit Ridge Notes - Friday - September 20 - 2019

Hey --- So ... TGIF...???

🙄 At Harvest Time ...Being Friday really doesn't matter much does it...??

... It's Just GoGoGo-Balls-to the-Wall...

**** Blues Boys West & N.W. of Us are winding-up with Harvest... Finishing Elliotts...Auroras...Libertys... Those in the SW-Corner are all done.

Your Blues "Post-Harvest-App" —Critical...

And one of my Fave-Growers reminded me to mention that when Tank-Mixing the Redox "OxyCom-Calcium" to take your time... Measure carefully. Be patient and deliberate with the Tank-Loading-Mixing Details... These Products containing Sooo Much HiTec "stuff" that Redox puts into their Reacted Formulations, sometimes require an extra few minutes to 'go-in'...into Solution.

Some of You have told me that you really need to take extra care mixing our Redox"H85" also...?? Time...Just an extra few minutes... the Rewards are Huge.

I am so hugely impressed with the Quality of Blues from you Redox Strategy Guys !!!

I just wish there was no such thing as Peruvian Blueberries... 🤔😞😡

🙄 ...that are currently ruining the Market for our awesome Michigan Blues...

**** "Balls to the Wall" ... Nope--Not naughty... It's an 'Aviation-Term' meaning Xtreme-Full-Throttle.

Many Years back... in most Military Aircraft the throttles had a Ball on the top of the Lever, and when in 'full-throttle-wide-open' position, that ball would be right up against the bulk-head-Wall[dash-board-Wall] ...Balls to the Wall... and Plural because each Engine had its own throttle.

****Yup----Really Obvious to me Now.... We will be doing several more Low-Rate "Kudos 27.5WDG" Applns next May-June.

The 4 - 3 oz-Ac-Apps done this past May in our Trials worked Sooo Great.... But I can see now where some new Growth is pretty significant. I'm thinkn 6-7-8--- 3 oz-Ac-Apps ... and we will boldly add our Calcium-Nutrition to each App... Because this past May-Trials says we can.

**** Q&A....Hmmm.... Yup... That is Correct. Back in 2004... "Cheng & Schupp"—New York Fruit Quarterly---Volume 12.No.1.pp.22-25... Demonstrated that Winter Damage is 'Not Increased' due to Fall Applications of "N" ...

But here's the thing... 4-5-6 Qts-Ac-GreenFeed-27-0-0 ...Doing both Foliars and Soil Applied, is never going to even come close to a significant threat of getting our Trees all Overly-Revved-Up going into Winter. This strategy will only help over-all-Tree-Health and Fruit-Bud-Health....Making next May more promising.

Reminiscing ...Guys that suffered pretty bad Winter Damage... after Zero-Fall-"N"Apps... But only because they got radically Cold-Temps-Radically-Early.... Yes—The GreenFeed-27 is compatible with anything we like to get into that 'Post-Harvest' Tank... It's an Xtreme-Clean-N-Source 👍

****Of Course... The VitaZyme for PostHarvest is a 'Given'... We always do VitaZyme **Pink **Petal Fall **2nd Cover **7th Cover[PreHarvest] and **PostHarvest... So Good... So Cheap ... Incredible Performer. Alicandro has been watching VZyme for 20[?] Years Now...?? He says '...just get it on ...4-5-6 Times...Get it in the Tank.'

****New Young Blocks... Per-Ac—Foliar....Soon... Final Appln-2019

Just talked to this Guy Wednesday...His "Post"...
---1 Pt.VZyme... 5 oz.Warrior1EC... 3.2 oz.Imidacloprid4F... 1 Qt.CS2005... 2 Qt.FormulaII-SW... 1 lb.DiKaP... 1 Lb.TriPlexMicro... 3 Qt.GreenFeed-27

...and...

Ya can if Ya want...?? But I wouldn't even bother with dialing in the TRV.... I'd keep all-full-rates and let all the BlowBy be a Soil-Amendment...

Praying Blessings on Your Weekend.... Gods Peace...r
