Fruit Ridge Notes - Saturday - June 20 - 2020— -Fathers Day Tomorrow !!!

HeyIt's 6-**2020**..... **The First Day Summer...!!!!**

....Officially about 6pm Today...
WunderGround... Says **T-Storms** later Today, TomorrowAM...and
MondayPM...Showers Tues.AM.
.....and Showers next Fri.PM & Sat.Morning...
10-Day-Hi-Temps--89-80-85-78-76-77-81-82-83-86 Degrees...Avg-Mid-80s
10-Day-Low-Temps--67-61-62-57-55-56-59-60-62-65 Degrees...Avg-Low-Mid-
60s

FireBlight and Insects LoveLoveLove this Hot Weather....

****** This Mornings agr.news...Jeff Warning All...** of the Dangers with
the "Hands-On-Manual-Workings" in Reeeaaally Young Trees. **'Dont give the
Blight Bacteria Free-Admission via self-inflicted wounds.'**
Jeff always says..."Stay protected with Strep and Low-A.I.-Coppers" ...
Of Course we all know how Jeff loves "'005'"..the **only 'Systemic'** Low-
A.I.Copper Bactericide-Fungicide on the Market... But to be fair to all the other
Manufacturers that hire him to look at theirs, he says "'Low-A.I.Coppers'"...
Always...Every Year...**Early Spring....Jeff** tells our N.E.-U.S. Distribution
Partners in that Wayne County-N.Y.Area, that "...the "'005'" will be the Copper-
of-Choice in UpState N.Y."so they don't run-out of it...🤔👍👍

****** Q & A....Regalia... Yup...Experts call it a SAR...** It's a strange one....It
really does work... Comes from a Derivative of the Giant-Knot-Weed....Crazy.
We love everything about Regalia except the co\$t...
Smaller TRV-Blocks use 1 qt-Ac-in-35-50GWA=\$16.75 ...
The Full Rate=3 Qts-Acre...

****** I Know There are Many Very Lightly-Cropped Blocks....**

.....**won't** be needing any "Return-Bloom" Sprays.... But...
I have seen some Well-Cropped-Too-Heavy-Blocks that I would most assuredly
be in there now with those Low-Rate-**ReFine 3.5SG** [NAA] Applns...2-3 oz-
Ac...or like 5ppm... Repeat in 2 weeks... and again 2 weeks after that...And be
hugely sure to get your BioShot on those Heavy-Cropped-Blocks...

****** Q&A - Yes....The BioShot** has plenty of Research-Trials performed by
several of our Fave-Experts.... My Consultant-Advisor-Type-Pals all agree it is
performing seriously great. You will always see Results with BioShot.... Just
like all those Years of FeedBack from You All on the

VitaZyme.... Gettn the Same Results... Incredible. Some Smart-Money Guys have this Dialed-In...and tell me it's workn out a bit Le\$\$-Co\$t than VitaZyme...??? 😞 I've heard that from Pals in other Growing Regions, but we were always selling VitaZyme considerably cheaper here-Michigan-compared to All other Regions....So... Dunno... But It's just a crazy good deal for sure...

**** **Yes It Does.... I've seen it...** Imidacloprid does kill Aphids ...Rosies....Woolies...all Aphids.... But if you are gonna get Woolies and Rosies...Ya gotta do all the things you do with all other "Special-Aphid-Cide-Applns"....Use more Water...Use 2-3-4-Pints-per-100-Ga-InSpray-90.... the Green Aphids are pretty easy compared to their ugly Cuzzns...

Dont expect to go out into a huge population ...with 1 App of 3.2 oz-Ac. and get all Aphids dead... Not gonna happen.... Keep this in your Tank-Mix several times....Whenever you don't have another AphidCide in the Mix....

Example....When you review the Pest-Targets for this Appln....and you decide on a Insecticide Rated "E" by MSU-E-154---that is also Rated "E" on Aphids....i.e. Grandevo, Venerate, Actara, Azomar 30SG, Belay, or Besiege...??? Then I would not add Imidacloprid to this Appln. I would always have it in the Tank when I dont have another Chemistry that is Highly-Rated against Aphids.

Yeah....I have noticed that...and agree the "AdmirePro" is a great Imidacloprid.... but it's just only the same as all the other fantastic Imidacloprid 4F products....except... for 10-20 years now it has cost more-per-acre. 😞

**** **So...Yes....There are those Xtream-Hi-Priced-SARs** that do have a Da.P.H.I. of **60 Days**...

Hmmm.... the Real Question should be....Why would anyone even ask...??? I hope you got that stuff for free !!!

You know ...you're allowed 12.8 oz-ac-per-Season of that SAR...?? 😊

😊Thats \$460.00 worth 😊😂🗨 Ya know if you have Full-TRV-Size Trees you really should use \$72-worth of this HiPriced-Stuff per-Appln....???!!!! So....

Therefore....the **SAver** is Reeeaaally goin out the door...especially where Guys are seeing FBlight. I consider 3 pint-Ac-Full-Rate...and I like it in the Tank at least 5 Applns-**Season**. Thats 15-Pints...Thats exactly \$55.96-Season-worth... That's delivering my Trees a SuperCharged-Inert-Ingredient-Package in a-**2-0-10 wSA**..... 🍊👍😊☐

Happy Fathers Day !!!!!
