Hey Pals.... Another Friday Rolls Around ...

Then....Starting late Friday-31st, a 50% chance thru later Sunday June 2nd. This is pretty Awful.

Amy heard somewhere that there ha only been 5 days in May without Rain...???

At least 5 of these Rainy Days there could be Lightening-Thunder.... some more "N" ...

The Lowest NightTimeTemps I see == 53*--52*--49*--*52*....
The HighTemps - Today Onward == 65*--76*--75*--73*--76*--69*--67*--68*--69*--69*So ... A Bunch-a-Boys thinkn FireBlight.....

******Reminder.... A significant F.Blight Infection can Initiate from ...**

A **Heavy Dew

A **1 Minute-Shower Blast ...

And Even **You & Your Rig Traveling thru the Block, after some Big-Heat-Temps ...You can trigger a F.B.Infection.....

Alicandro has EyeWitnessed where FBlight became an Epidemic right up to the Trees where the Tank ran out. So....Gotta have something in the Tank to fight F.B. if the Weather is High-Risk-Warm with Bloom still On.
OxyTet....Strep...**CS2005 ... My 1st Choice is "'005'" at 1 Pint

****** Q & A Several**

~~~**Why** the Heck do I keep harping on LambdaCy(Warrior) so Often ...???? Cuz... This OIWarHorse is Labeled for virtually Every Crop you can think of--Like over **200** Crops.... And a huge Long List of Pests ranging from JapBeetle - Thrips - Oriental Fruit Moth - Leafrollers - P.Curculio ..... and about **90** more.... And... It's almost virtually **Free** !!  
At the Rate-Acre recommended for some Crops @ 3.2 oz-Ac it calculates

**\$1.50** per-Acre 😊👍🤔🤔

~~~ **Yes** - So Far...Very Clean & Cool !!! The 10-Ac-Trial-Blocks have Empires--Macs--RedDels--Goldens....and a several other Varieties that are Scab-Susceptible.... and they've been only getting the "'005'" once a week. Still Lookn Good ....Can't find any Scab Symptoms !!!! You all heard Amy say she has found Scab Infection Foliage a week ago ...It's kinda easy to find now in places.
