Fruit Ridge Notes - Tuesday - May 21 - 2019

Hello Friends

Another darn chilly day..... Tomorrow is supposed to be Hot-Humid.... 70% chance-Rain early.
...Predicting ThunderStorms for Friday--Tuesday--Wednesday-29th....
....says WunderGround.

******Blues Boys**asking about "Bloom-Insecticide-Product-Choices"

1. Always go at night with your Appln ...Why bother the Bees ??Even tho the Insecticide is Non-Harmful-OK-for-Bees...
2. I'd be doin BioProtecPlus.... Grandevo 2 lb.... maybe Venerate 3 Pint
If you're lookn at using a BT.... Do the BioProtecPlus.....
Its like a BT on Steroidslike 5X the Butt-Kick. 4 Hr.REI....Zero [-o-] Da.PHI ...

1.5 Pint-Acre = **\$11**aren't those BTs all \$22 - \$35 - Ac...???

For Diseases in Blues Look at generic

QuiltExcel"AzoxyProp" @1 Pint--Acre... That's a Combo of Abound & Tilt

...and You can always jazz up your DiseaseControl Strategy by having some "**005**" in the Tank. CS2**005** controls a Long-List of Bacterial & Fungal Diseases. If you use 12 GWA up to 35 GWA, do 1 Pint-Acre. If you're using closer to 50 GWA, use 2 Pint-"**005**"-Acre.

******Perlan on the Red Dels - Gala - Braeburn - Gingers** for improved Typiness & Fruit Sizeat Full-Bloom.... 1 Pt-Ac. Use some InSpray-90or Regulaid or Activator-90 with this App. You can also add your F.Blight Protectants to this Tank.

And... you can do a 3 lb. EBDC if you want. Some guys avoid Captan during Bloom...???

For the Perlan to really work best, you like a Warm day to follow Appln. Tomorrow is supposed to be that.

Thanks for Your Patronage
