## Fruit Ridge Notes - Wednesday - May 13 - 2020

**Hello Friends .... Another Very Chilly Morning ....** Some Guys saying 29°F... 😞  
...as we continue to simply Take-What-We-Get... 🙏 and Keep our Hands Folded ...  
...and Lookn Up... 😊

**Hey...No More real Cold Temps** in the Short or Long Range 🌤️.... the Lows are all in the Mid-50\* range...  
... and when you include today, 8 out of the next 10-Days-Forecasted are supposed to get SunShine. 😊

\*\*\*\* **MSU Amy mentioned the Symptoms** from the Big-Bad-Infection-Event April 29...??? ...will not be visible til the 22nd...??? That's adding several days to the "Norm" due to the Cold-Crap-Weather of late...??!??

We Wanna **Keep in Mind** ..... The Remaining Crop that has gotten thru the recent 4 to 5 Mornings of **Too-Dang-Cold**...??? ...is likely gonna be worth a Premium... with said Situation being exaggerated by the comparable Frozen-Plight of our New York Pals Apple Crop ... So.... Whatever we bring to market we want to be as Clean as possible. Think\$\$\$Premium. Fruit Buyers CheckBooks get a little Wild & Crazy on Years like this...

\*\*\*\* **SJS... I Know...Serious Issue for Some of Ya's...**

**If You Can** Do the Lorsban...??? 😞 i.e. Chlorpyrifos4E...??? That's Wonderful !!!  
**But...That is a mighty big "If"** .... If so...Then I would do that fairly soon...?? TightCluster to Early Pink.... Open Cluster .... very Good Timing... 2 Qts-Ac...the old 4E Cheapest & Best ... This "4E" is a radical-thorough-serious-old-O.P.Chemistry that very effectively controls a very long List of serious Insect Pests... And....the Recommendation by 'Others' ???...to use any **Oil** products 🙄 with "4E" is very **Highly UnRecommended** by us. Oil on top of all of this Cold would be Awful... Not to mention the other 16 viable arguments **against** using any Oils. Use the 4-Pints-per-100-Gallon-InSpray-90... No Hassles...all Good Stuff...and works really impressively great.

**If I cannot do the "4E" ... ????**

Then I am doin 3-4 oz.-Ac. **Azomar** 30SG[gn Assail] with 10 oz-Ac-PermUp 3.2EC plus 24 oz.-Ac.-Prevam.  
This isnt going to be as ButtKickn on S.J.S. as the "4E"...but this Combo will be doggone good on all the other Key-Pest at this Timing.... Later ...We will need to be very on Alert for the SJS-Crawler-Stage...early 2nd Cover normally...??

This Azomar 30SG is a very Good kinda New generic for Assail... 🙌 I Like it... Later I'll be lookn at using full-rate 8 oz-Ac. Azomar 30SG ....Using less now...mainly because its pretty rough on Bees.

And....**As you Ponder** all the above "Factors-of-Input" .... 😞 ...???

In a '50%-Crop-Year' ....You may indeed be more "In-the-Drivers-Seat" when selling your Crop...??? But.... Dont get too reckless...??? Don't "Paint Yourself into a Corner" ...

We're on the Web!

See us at:  
[www.reisters.net](http://www.reisters.net)

Check out Agrian Website.... Chlorpyrifos4E... Labeled for just about Everything... If you have some "On the Shelf" and are afraid to use it on Apples.... Look at your Options. Lots of Options....

\*\*\*\* Thank You !!!! Yes ! ...H-85.... Soooo Many Guys so really impressed with what they see with H-85...

Here's Why .... It's technically a 0-0-15....But... It has 42% HumicAcid. It is a "ReActed-Plant Nutrient High in Soluble Carbon" ... H-85 radically increases Soil Microbial activity due to \*Short & \*Medium & \*Long-Chain-Carbon Content...

A Couple of the Benefits...??? Increased Soil Nutrient Release ... Reduced Soil-Nutrient Loss.... H-85 is a soluble performer across a wide range of Soil pH. It helps huge with Water Penetration... Soil Health... Root Growth... Nitrogen Efficiency.

For several Years now, Smart Money has been using--watching this stuff @ 1 - 4 Lbs-Acre.... and also in Row-Crops as a Seed Treat @ 1 Lb-100 lbs.Seed... Pretty amazing..... Some say incredible...

\*\*\*\* I know !!!! 😊😁😄 Hilarious !!!! ....

The Right-Hand having no clue as to what the Left-Hand is doing...😄 For 10 Years now we have been bringing in CS2005 from MagnaBon by the Truck-Loads..... Way over 4,000 Gallons per Load !!! ...Multiple Loads-per-Year !!!

Hundreds of Michigan Grower Pals using it in Tree-Fruits--Veggies--RowCrops--Cane & Bramble Crops... hugely Successfully and Hassle-Free....

👍👏😄 No BluePaint..... No Sludge in the bottom of the Tank.... No Phyto.... No Scab .... No FireBlight... No Summer Diseases ...No Tank-Mixing-Issues.... Tank-Mixing with Anything we want... 😊

What an Incredible Story of Stellar Performance and Low-Cost-Efficiency and Trouble-Free-Procedural-Practices..!!!!

And yet...😄...on Pg.32 in E-154 it says... "MagnaBon has not been specifically tested for disease control in Michigan."... Frankie from MagnaBon has indeed given "'005'"Product to several various Folks from MSU that have requested it .... 😊 ...probably 6-7-8 times.... but I think he would have to make a donation for getting the Results...??? The only 1 time I recall seeing any results is at a Meeting when a competitor-Copper-Product-Manufr-Rep showed where his Copper worked better than all the rest...??? ...and then we found out that in that Trial they used "005" at 12 oz-er-100 gal.?? ... or 12 oz-per-300 Gal...??? ...Something really way-out-screwed-up-weirdo-crazy. While most of You do 1 Qt-50 Gal-per-Acre.... Works Xtremely Well.

Pg.32....under MagnaBon .... Hilarious .....

Warmest Regards....
