Fruit Ridge Notes  
from Ron Reister  
C.C.A.

## Fruit Ridge Notes - Monday - October 12 - 2020

### Greetings Friends ....

Your Pals in Canada are Celebrating their ThanksGiving Day today ....  
And Here... It's Columbus Day ... and Tomorrow is the **245th**  
**Anniversary** of the Establishment of the **U.S. Navy**.... But our actual  
National Navy Day is October 27...  
... and don't forget this coming Friday is 'National Boss Day'... 😊 😊 👍

Didja notice how close the **WunderGround** Folks called it in their **10-**  
Day....??? Even the Wind issue...??  
But I see now they have taken acupla days of SunShine away from us.  
They're now saying only Tues-Friday-Saturday with good Sun, and then  
Wedn-Sunday-Tues-Wednesday with a chance of **some** SunShine...  
Their lookn at 56°F-Avg-Highs ...and forecasted avg-Lows=38°F...  
Those averages are down from just 3 days back=== i.e.Friday they said  
62\* and 43\*.... So.....  
....Moving aggressively toward that November Weather.  
And..... Only 22 Days til Nov. 3rd Voting....  
Only 33 Days til "'Opening Day'"

Did you notice Opening Day this Year is on a Sunday...??? 😞 ☐ 😊 😞 ...  
We will likely start the "'Dads Barn Session"' Sat.PM.... and Regroup  
Sunday 1pm.... with Sunday Morning reserved for Worship as per the  
'Normal'...

\*\*\*\* **The DeeTeam** is already lookin at some serious 'Year-End-Deals'  
on some popular Products.... Stay Tuned...

\*\*\*\* **More Discussion....** Yes....the '**Big-Full-Rate**' of the Ol'BluPaint-  
Sludge-Coppers is the main Idea... Really plaster it on those Young-Hi-  
Dollar-Blocks with the F.Blight-Symptoms... That Ol'Formulation-Cu will  
hang on to the twigs-scaffolds-etc...and it seriously helps to "Shut-that-  
Tree-Down" thereby Prepping it for the really cold Weather coming in a  
few weeks.

Do your "'**005**'" soon....Do the Blue-Sludge 2 weeks after.  
Those old Formulations have a miniscule herbicidal effect.... like back in  
the day your GrandDaddy would put it down into the Drainage Tiles, to  
eliminate obstruction from Roots .... That same abrasiveness is why we  
dont use those Ol' Formulations passed

Green Tip-1/4 Inch Green in the early Spring....as it causes Russet.... while the "'005'" doesn't.... according to an estimated 10,000 acres of HiDollar Apple Varieties that are getting 6-7-8-10 Applns-per-Growing-Season of "'005'" ....

\*\*\*\* **Post-Harvest Herbicide Trip....** Yup...Our Guys do *A Lot* of Goodies in that Tank....Nutrition... Residual Herbicides.... 2,4-D....Grass Burn-Down... Soil Insecticides... I mean *A Lot...*

....But the main thing they start with is the *Indicate 5* and the *InSpray-90*.... Those help all of the Tank-Mix-Partners get along very well...and play really nice together. Just use 1 pint-each-per-100-Gal.

And remember what the Row-Crop-Guys taught us about the **ORO-Agri** Products.... Wherever they used some *Vintre...or WetCit...or ORO-RZ... or ORO-Boost... or ORO-HSMOC*.... 1 Qt-per-100-Gal... They killed Targets that their Glyphosate normally only partially killed due to Resistance... But **ORO** with the Glyphostae killed it... No 2nd Pass necessary...

\*\*\*\* **In the Past few Harvest Seasons...**We have had Growers tell of some kinda serious ugly cracking in Honey Crisp. and then the following Season they got into the **Parka** with a very respectable Success Rate. I would really appreciate any-all-Feed-Back-Input on how it looked this Season....when ya catch a breath....👍👏☐😊

*Gods Peace....Locked & Loaded... Always Intentionally Politically Incorrect On-Purpose....r*
