Fruit Ridge Notes - Thursday - April 16 - 2020

A Very Cold Thursday Morning Too Cold in some Spots I'm Afraid... 😞...

Talked to a Pal in SW-Corner--They are in "Tight-Cluster" and had 23°F early this AM..... According to the 'Charts' they will of course have some degree of Crop-Reduction-Damage... 😞

The Goal is always to have to take our Thinning Efforts very seriously. Mother Nature can be a Wonderful & Lovely Lady ...but when it comes to thinning Apples...??? She's not very consistently good at it....

**** For Ridge Dwellers

Old 'Rule-of-Thumb'for Half-Inch-Green [HIG] ...the "Charts" predict a 10%-Crop-Loss at 23°F

....Tight Cluster is normally only a few Days away from HIG..... but with these Temps...and this Forecast, it could take 2X-of-Normal... 😞

**** **Today's MSU--Zoom--Webinar Offering** via Amy & Crew-- Noon-- is featuring **George Sundin**....

"Apple Disease Update" ... You must already be pre-registered!!! Or this link won't work!!

"[msu.zoom.us/webinar/register/WN_-qxDONyKQOim4418e8cBMg](https://msu.zoom.us/j/9101111111)" ...or contact Jennifer Zelinski 231-946-1510 ... "goodr100@msu.edu"

**** **Q & A ... Yes....** Thank You ...

Those **ORO-Agri** Products that our Row-Crop-Pals use to *Hugely Exaggerate* the Efficacy of their Glyphoste ????. With ORO they are making 'One-Pass' do the Job !!!

Amazingly... One of my Fave-Corn-Soybean-Alfalfa-Guys.... *almost accidentally discovered* that the ORO-HSMSO made his RoundUp work so well, that he did not have to go back with a 2nd-App. Fran from ORO-Agri told him this would happen, but he was very skeptical. Most All RowCrop-Guys plan on 2 Applns-Minimum Nowadays...

ORO-Agri has this "'Trans-Phloem-Technology'" ... and its in several of their Products It simply enables the Tank-Mix-Solution to move rapidly thru the entire Target-Plant-System. Pretty amazing difference ... Just more Real-Deal-Science....

**** **Nope ... None** -- Zero -- Nobody -- Not One of our Fave Manufacturers that make our Fave Nutritionals, are making any Claims about any "Disease-Control" related to Applns of their Nutrients Not One.

It is against the Law in most States to make any Claims inconsistent with the Legal-EPA-Labeling.

Any and All insinuations I might repeat are coming *from You ...or Your Neighbor ...*

It's what You are seeing 😞 From your Observations of your own Program.

If you show me that you recorded less than half of the Fungicides-Bactericides-Insecticides applied on Parcels-Blocks-Fields where you have a Hi-Tech-Nutrition-Strategy...???and you give me permission to share it ...??? 😞 I'm likely sharin....👍

.....And I don't mention your Name ...ever unless you seriously want me to...😞

**** **Yes...The Scab-Fungus** is alive and well under that Frosty-Face....

Scabies easily survive our -15* to -20* Below -Zero in January just fine....

It doesnt scare them..... Doesn't bother them...

😞 This Global-Warming is just chilling ...

Thomas Jefferson said"I prefer dangerous Freedom over peaceful Slavery."

Keep Lookn Up Our Awesome God Wins
