Fruit Ridge Notes - Tuesday - July 14 - 2020

Greetings Pals.... Happy Tuesday Beautiful Morning.... 🙏

WunderGround 10-Day saying chance of Rain Tomorrow Night....Chance of ThunderStorms Sunday AM, Monday, Tuesday AM, and Thursday AM-the 23rd.... and 😊 6 of 10 Days with SunShine.

Hey....Its gonna get really really Warm again too.... 😞

****** Parka...from Cultiva IPM... It's All About the Cuticle....**

Parka effectively continually repairs the ruptured Cuticle. The Fruit-Skin-Cuticle is continually rupturing due to Growth....Fungal Attacks... UV-Attacks by intense Sun... the Parka simply mimics the Cuticle and helps it repair itself.

It's a World-Wide thing now.... Huge in the PNW.... Many Tree Fruits.... Small Fruitsand now Veggies are taking it seriously.... All the Apple Guys that haven't tried this stuff against SunBurn--SunScald...???Really Gotta take a look....

Researchers are braggin on it....World-Wide.

****** The DeeTeam is Planning Something** kinda Fun... 😊 Maybe about a Month out...??? 😊 Keep watch for Info-Blurbs that they will be adding to these Fruit Ridge Notes...

****** Yup... You Sure Can...** For Getting 'Non-Bearing-Young-Apples' to Hang some Fruit....

.....the commonly used Rates are 16 - 24 oz-Ac-**Motivate**[Ethephon] and 5 oz-Ac-**Refine 3.5SG**...

This works especially well on Fuji & JonaGold & EverCrisp But be very careful ...Stay far away from Gala, Mac, Cortland, Empire...the Summer Varieties.

I feel this is kinda scary.... with the Temps & Sun we've been getting...and the Forecast...

Don't do this where Trees are having trouble 'filling their space'... and dont do this where there is Stress from drought. I know a bunch of Ya's have the Irrigation running really fine.... but.... 😊 It's crazy dry.

****** Several Veteran Growers ...** Guys that have grown up watching all the Crop-Producing-Strategies & Tactics & Front-Edge-Technologies.... Lots of them ... Ranging in age from 28 to 75 yrs old...are now "All-In" for the Redox Strategy... 👍 They are showing us Crop Samples....Telling us of reduced Pesticide Rates... showing us impressive Yield & Quality Documentation... Showing us their \$aving\$.... Sharing their Fave Tank-Mixes.... Over half of these Guys like having the DiKaP in the Tank with their "'005"'...claiming a serious positive Synergism with those 2 Products. Both products get inside the Plant Tissue. Most of these Guys claim seriously less FBlight Symptoms than they see driving by the neighbors.... Like Zero. The Tart Cherry Guys doin this Combo are very Happy.

Some very Hi-Tech very scrutinizing Guys have done very comprehensive Side X Side Trials.... They used the Top-Shelf-Hi-Dollar "'Programs"' from 3 BNR entities and ours, wherein the Redox Strategy was the Least-Expensive.... and yet ended up with a huge Win in all categories and Parameters. Some of the "other" Programs were nearly 2X the Cost....some actually 250% higher... 😞

****** Yes...Sorry....**

....the cost per-Acre in Blues for the Medium- 5 oz-Rate of Entrust = \$75 Acre.... 3 Da.PHI
\$15-oz

I forgot to say the cost in FRNs Saturday...

****** Yup... Please Check Out "'Reisters.Net"'** the Office Hours at Fruit Ridge Ave--West of Kent City-- 8am to 5.30pm-- Mon--Fridayand Saturday 8am til Noon... Closed on the Lords Day.

I don't actually have any real Office Hours at my Home Office-- Gooding St...6 Miles West of Sparta....???? Just Call me first 616-437-0073 ...to be sure I'm here... or wherever 😊....Maybe I'm in your Neighborhood....

Have a Cool Tuesday
Locked & Loaded....
