Fruit Ridge Notes - Monday - February 11 - 2019

Greetings on This Gray Monday Hoping You All had a Great Week-End.....

Did you RSVP for Tomorrows Short MeetingSharing New Info on the *BioProTect & *FungOut from AEF-Global...???

The same Info-Content will presented at each of the 3 Meetings.... which include a 7.45a Breakfast Meeting.....a 11a.Lunch Mtgand a 4.30p Dinner Meeting.....

All will convene right here in my **Office-Conference-Room**, which only seats 10 Guys. 1st Calls--1st Seated.

Breakfast will be offered during the PowerPointPresentation..... Lunch will be served at Noon following the PPPn, and Dinner will be at 5.40pm at Big Joes following the 4.30p-PPPn in my Office.

******BioProtect and FungOut** are very Cost-Competitive-Well-Performing Tools for All Production..... But You Organic-Production-Guys are the Ones that should really seriously appreciate the ""New-Tools"" in your Tool-Box. Pls RSVP right now !!! 616-887-9933 616-678-7708 Theres still a couple Seats left in all 3 Meetings.

******Several Guys** are getting the necessary paraphernalia on hand so they are ready to grab Soil-Samples for us to get sent in to the Lab affiliated with the Redox Folks.

You remember from Redox University that there are, depending on what we ask for, 30-50 Data Points, to afford us a seriously comprehensive Analysis of what is really going on in your Soil.

AndYou likely recall that a "normal" Soil-Test gets you 8-9-10-12 Data Points.....If you request that many.

Is your pH perfect right now, but you really want-need more Calcium...???

So.....
1. Easy-Low-Cost for OrchardsJust Spray "Phoenix Calcium" in Your Weed-Control Strip....right in with Your Herbicides.

Hay-Alfalfa-Grain Fields.....Just Broadcast-Spray-Phoenix with any Nutrition or Herbicide or All-of-the-Above-Sprays.

2. Not so Easy--Not so Low-Cost...."Gypsum" -- Calcium-Sulfate....won't raise your pH.... and gets you some Calcium....But kinda 'slow-release' compared to Phoenix.

We have several Growers now that won't do any Granular-Bulk-Spread-Anything Anymore. For 6 Years now, the Low-Cost-Convenience of the New-Advanced-Hi-Tec-Programs is just impossible to intelligently argue against. It's all Science. And it's working fantastic for them and they are spending less.

One Guy told me it costs him as much for the Equipment-Fuel-Labor-Etc to Bulk-Spread Gypsum-Lime as it does for the Product.....????

*****Looks Like---Sounds Like** Quite a few Guys Organizing & Cleaning in the Spray-Chem-Building.....

Every Summer somebody does a really good job on their Lawn with Glyphosate/RoundUp..... Thinking they actually had 2,4-D in that container. The best 'Rule-of-Thumb' is to never ever ReUse a Pesticide container.... But DoggoneIt.... Some of them are just too nice to toss. Ya really gotta be careful if you're consolidating Product..... Ya gotta really make it be Labeled correctly Better Yet, Just toss that wonderful empty container.

Hope to See Ya Soonr
