## Fruit Ridge Notes - Saturday - June 29 - 2019

### *Good Saturday Morning to All ...*

What a Beautiful Day We are in for ... ??? !!!

*Seriously* .... Later Yesterday on the way home, I indeed for sure saw a Neighbor Planting, and there was actually "**Dust**" !!!!! 🙏 😊 🙌 😊 😊

\*\*\*\* **Another Tart Cherry Pal....West of the Bay ....** Just told me how impressive the "005" is working for him on Leaf Spot.

He is using 24 oz-Ac. in 50 GWA. He's going to add 2.5Lb.Captan to that this next App to get additional Protectant.

I hope ... Really seriously hope all of You are not adding any "*Nutritionals*" from '*Down-the-Street*' to these "005" Tank-Mixes going on Sweets and Tarts...???

The Cherry Guys using all of Our own Fave Stuff are really having fun Success ...But I have heard too many Horror Stories from when Guys dump in some Hi-Priced-Nutrient they bought from a BNR, and it turns out it's not even compatible with Itself. And then to make matters worse, they see Phyto from it on Foliage.

### \*\*\*\* **I Know... those Cedar WaxWings are so DogGone Cute**

.... Right...???

But They're one of the worst for Picking Your Sweet Cherry Crop before you do.

If you have been using the Avian Control Product, and you have it mastered and dialed in, then you are not losing even 15 Lbs of Sweets per Acre to the Birds..... If you haven't used Avian, you're likely losing more than 5000 - 10,000 Lbs out of a 10 Acre Block just by Bird Feeding. This stuff doesn't kill those CedarWaxWings...or Robins, but it is like Tear Gas to them. They hate it. They Leave.

**1st Step** ...Before any Birds are in there.... 35 - 40 oz.-Ac. AvianControl in enuf Water for thorough Coverage. **Do Not** lower pH of Tank-Mix.

You can do Pesticides with Avian, but not the ones that require a Low pH. For Avian you want pH at 7 - 8.... which is what Most of You Guys already have right out of the Well.

**2nd Step...** If 1st-App gets over 4/10ths In Rain, ReApply ASAP using 24-30 oz-Ac.

**3rd Step...** If 1st App does not get diluted-washed-off ...Apply that 24-30 oz after a 7-8-9 Day interval. If you had 1 - 2 Drizzles, real light rains, figure 5-6-7 Days Interval.

If you have never used this Avian before, You'll likely need a 3rd Appln, depending of course on how much viable valuable Fruit you still have hangin. If its no longer valuable, Don't.

**4th Step...**If You need a 3rd Appln, do the 24 oz - 30 oz Rate. Smaller Trees, use the lower rate... Big Trees...Big Rate.

Science has proven Birds have a bizarre Memory-Asset that tells them your Sweets Block has Tear Gas in it, and they *Do Not* wanna go there.

Did you know that the same Birds come and hang out in the same Neighborhoods year after year...??? That Memory serves them well, and they will eventually not even try to come to your place. And you likely notice that you don't need a 3rd App.

\*\*\*\* **Blueberry Growers -- Love Avian .... We just delivered another Tote** to one huge-acreage Blues Pal .... He has it seriously Dialed-In... Average use across all his acreage.... 3.5 Pints .... costing him less than \$40-per-Acre-Total Season. If you do 550 - 600 Ac-Blues, you would use a Tote, and that is by far the most Low-Cost-Way to buy Avian. We have 2x2.5s... 15g.Kegs... 30g.Drums ...55g.Bbls also.

\*\*\*\***There are a Few Guys around Shelby** that have a F.Blight Flare-Up....So they are doing a Variation of our "**1-2-3**"....

They customized it into a "**2-2-2**" .... 2 Pt. "**005**" ...2 Pt Regalia ... 2 Pt. Formula.II.SW .... So... They are adding 1 pint "005"and backing-out 1 pint F-II-SW. ....which actually makes big sense to me. That "**005**" is by far the strongest component against FireBlight ....radically enhanced by the F-II-SW.

\*\*\*\* **Question... "FungOut" to Burn-Out**

**Secondary...???** Don't Know. At our Meetings, Several of You heard the R&D Guy from AEF.Global telling us all they have done with FungOut.... the Eradication-Back-Action-Attributes .... pretty impressive stuff.

For Burning-Out Secondary I just dont have any experience. I would be very interested to know what you find if you were to try it on a Tank....???? It's certainly cheap enuf.... and will certainly work good against the Summer Diseases...

***Praying Blessings of Relaxation & Safety & Fun for Your Weekend....r***
